

Business Enterprise Architecture (BEA) OV-SV To Be Constrained Diagrams

BEA March 31, 2005 Update

*Arming the Warfighter
Through Business Improvement*

This represents a set of BEA “To Be” Printable Diagrams in MS PowerPoint format as generated by Popkin System Architect for your convenience. Sometimes the translation from Popkin to MS PowerPoint is not perfect and results in overlapping ICOMS, message names, etc. No attempt has been made to correct this. If you find a diagram such as this and it is a problem, it is recommended that you print the diagram from the HTML SVG file.

To print diagrams:

- 1) First select File->Page Setup**
- 2) Select “Slides Sized For” and choose your printer paper size**
- 3) Choose your orientation (nominally landscape)**
- 4) Choose “OK”**

Additional considerations:

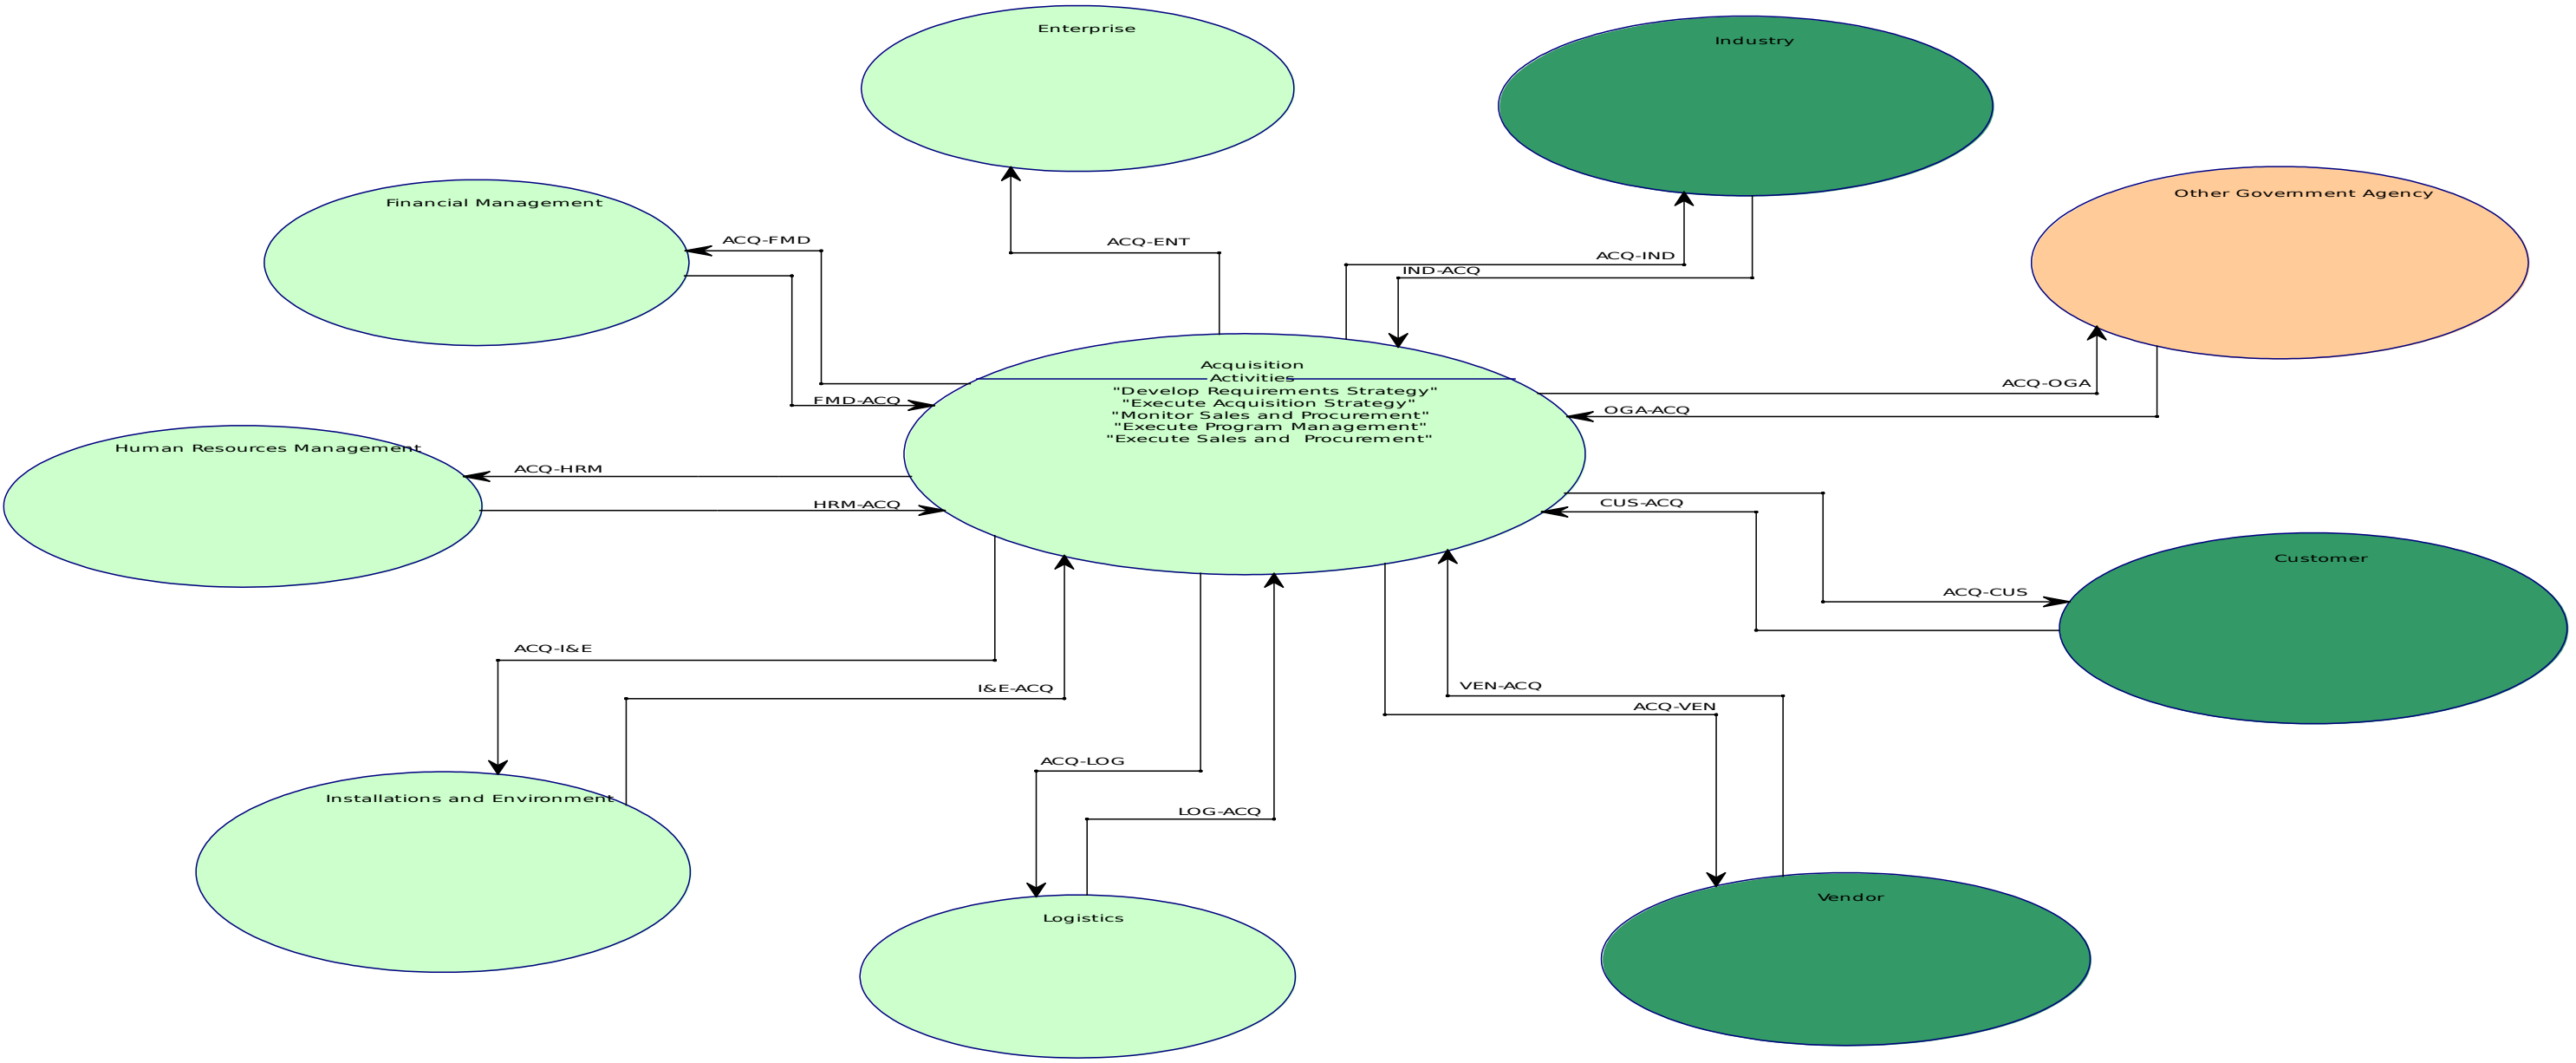

- 1) When printing you may select scale to fit paper to size the drawing to the max that will fit on your paper. However, sometimes this has strange results.**

This diagram describes the development approach that will be used by the Architecture Maintenance Team (AMT) to expand and evolve the Business Enterprise Architecture (BEA) OV-5 Operational Activity Model. The Call 1.0 Performance Work Statement (PWS) requires the development of a single, integrated OV-5 Activity Model that covers the scope of the DoD Business Mission Area (BMA). Leveraging the Enterprise Business Process Model (EBPM) work to date, aligns with Domain-approved Business Capabilities, is consistent with OV-5 Activity Models from BEA v2.2, and aligns operational activities with the Federal Enterprise Architecture (FEA) Business Reference Model (BRM). The current BEA consists of separate Domain Activity Models with overlapping and redundant activities. The DoD Architecture Framework (DoDAF) instead requires an integrated enterprise model. Such a single, integrated, high-level Activity Model will provide the context for linking and grouping supporting Operational Activ

BMA - CV - 0.0 - Conceptual Overview

BMA - CV - 0.0 - Conceptual Overview (OV-07 Logical Data Model Subject Area)

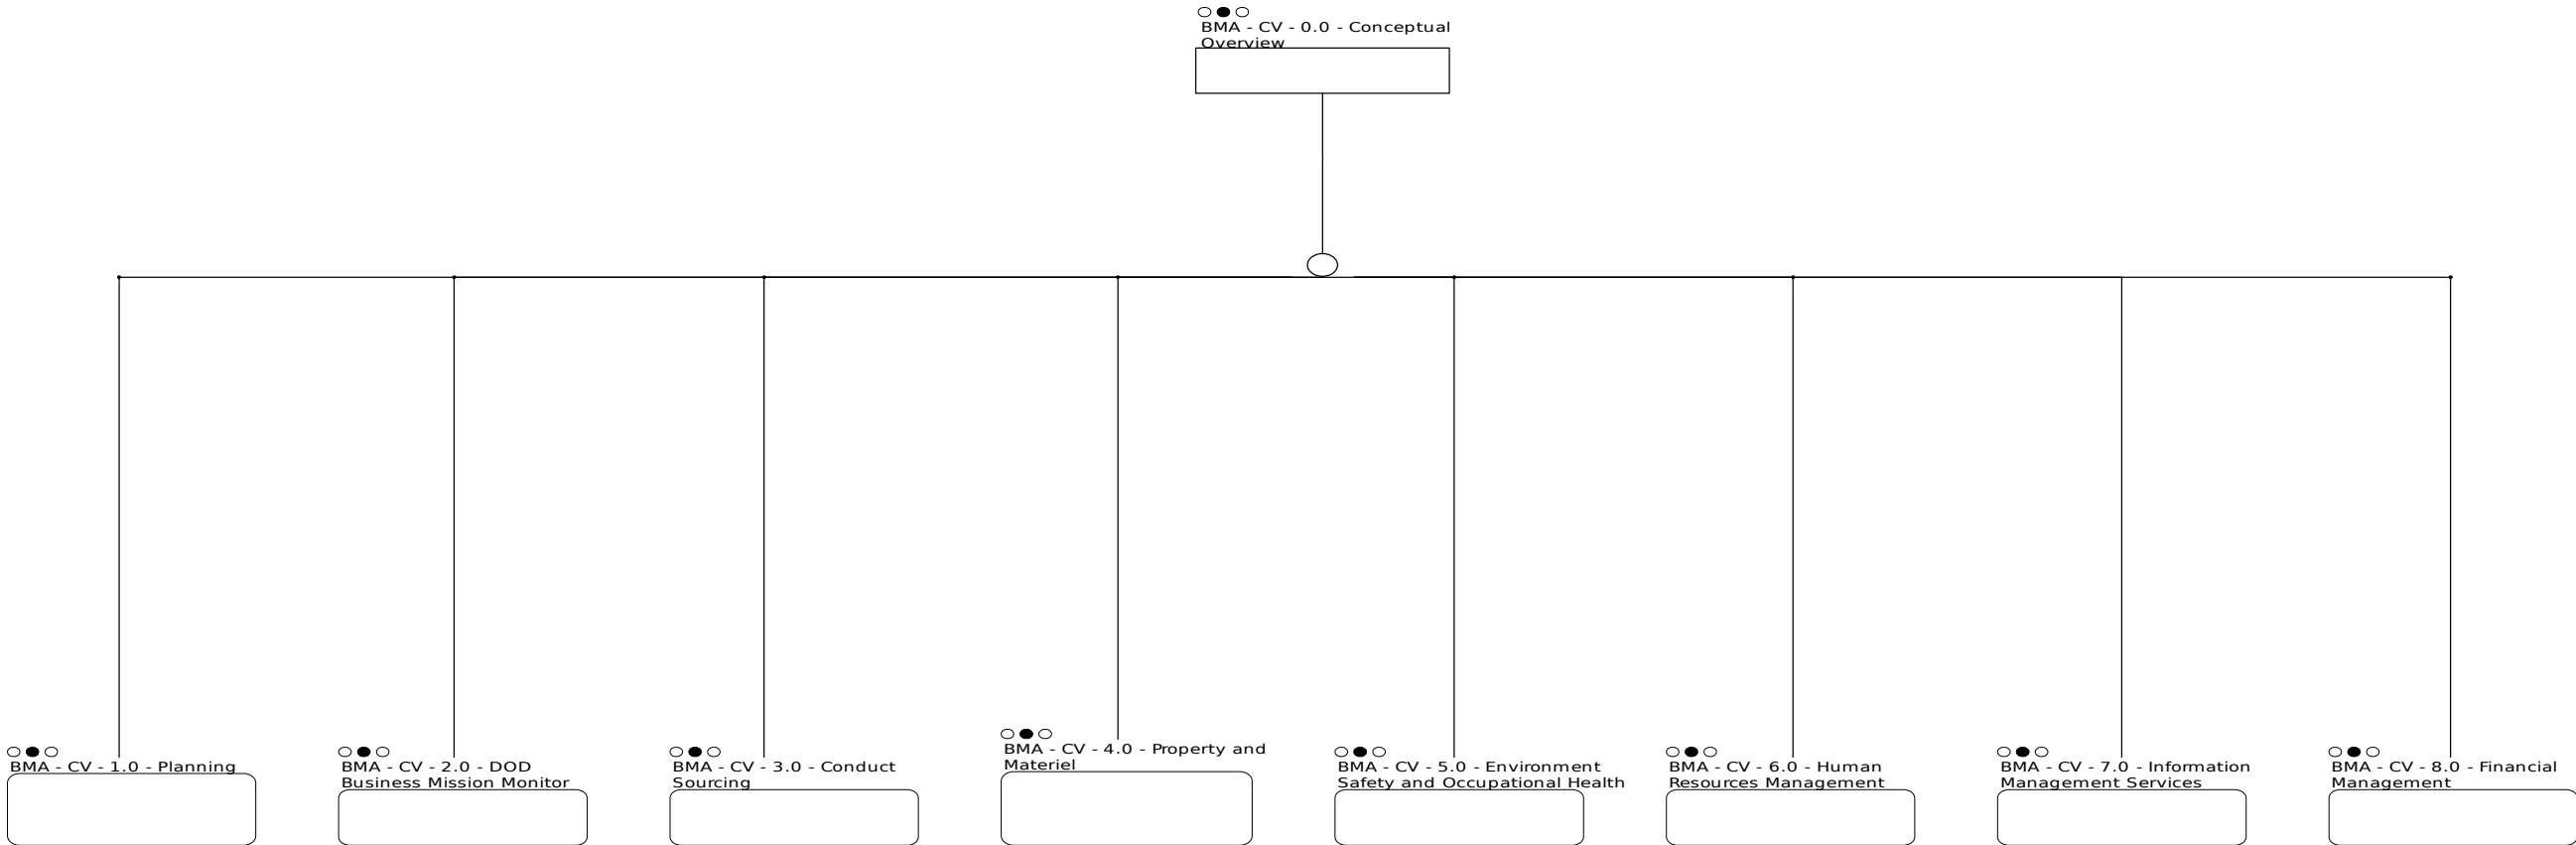

System Architect

Wed Mar 30, 2005 12:15

Comment

The BMA CV 0.0 Conceptual Overview is the highest level of abstraction of the OV-07 Logical Data Model supporting the Business Mission Area within the DoD. It is aligned to the OV-5 Node tree, which is the highest level BEA functional view and provides an executive view of the data requirements.

0.0 Conceptual Overview

BMA - CV - 1.0 - Planning (OV-07 Logical Data Model Subject Area)

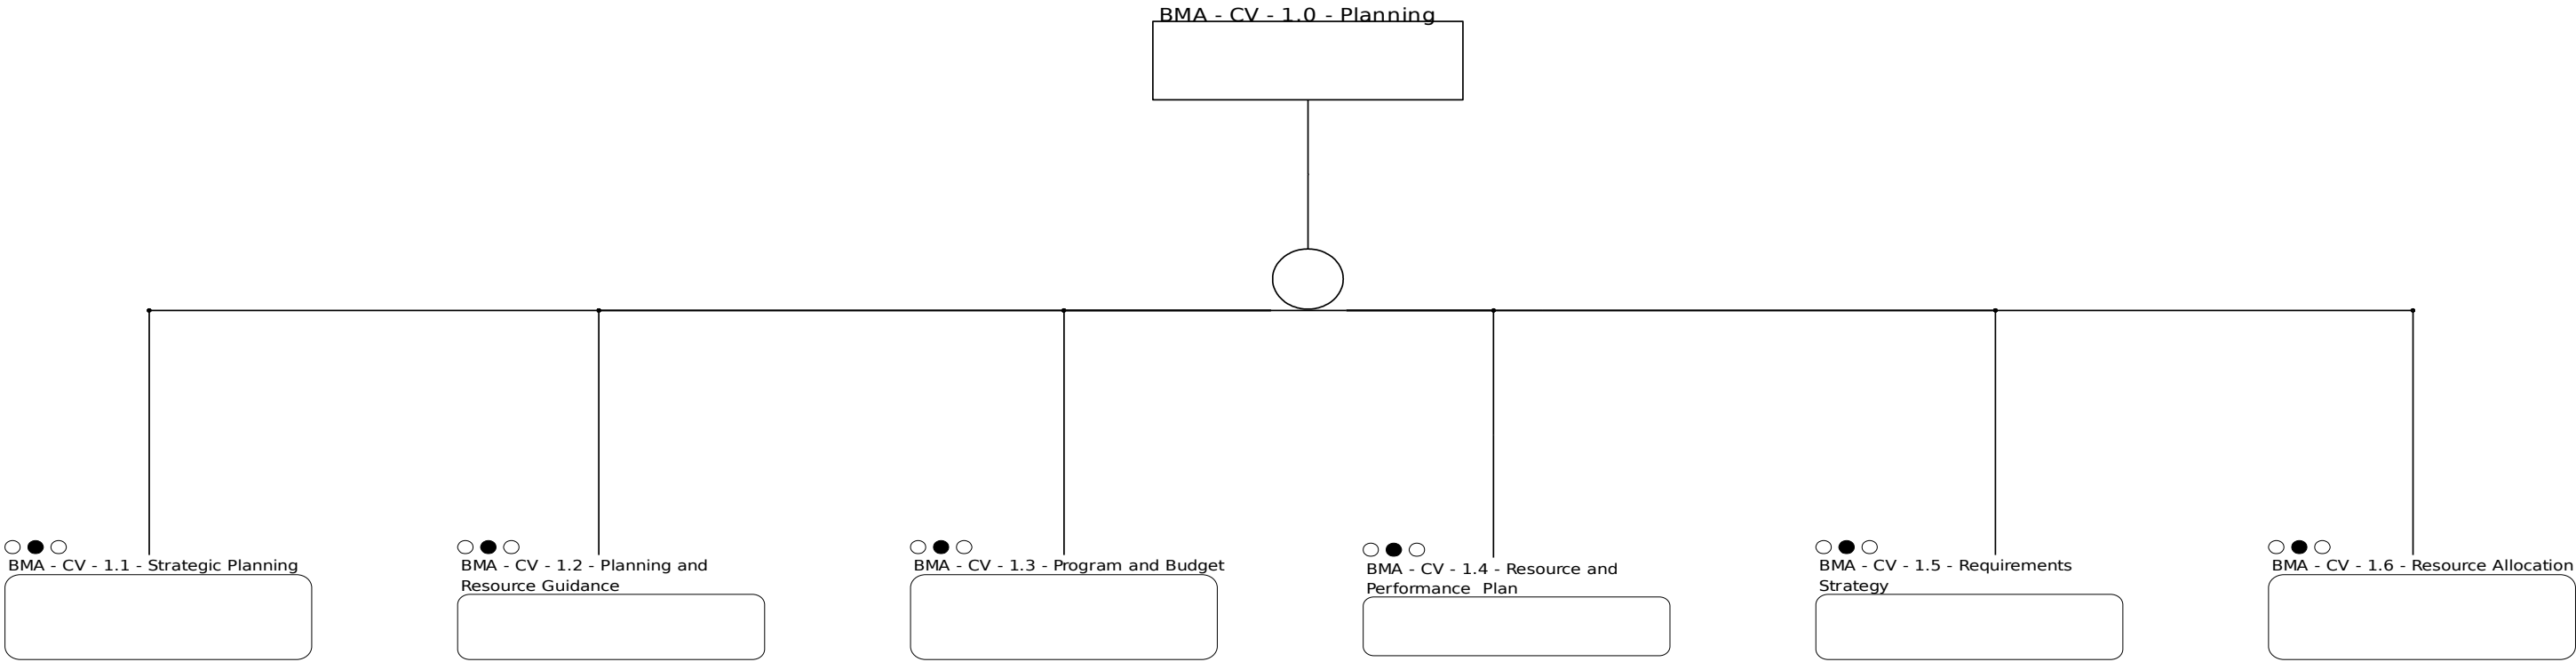

System Architect

Wed Mar 30, 2005 12:15

Comment

The Planning view determines, identifies, establishes, and allocates strategic direction, identifying and establishing defense programs and processes, and allocating resources (capital and labor) among those programs and processes to perform DoD's mission.

1.0 Planning

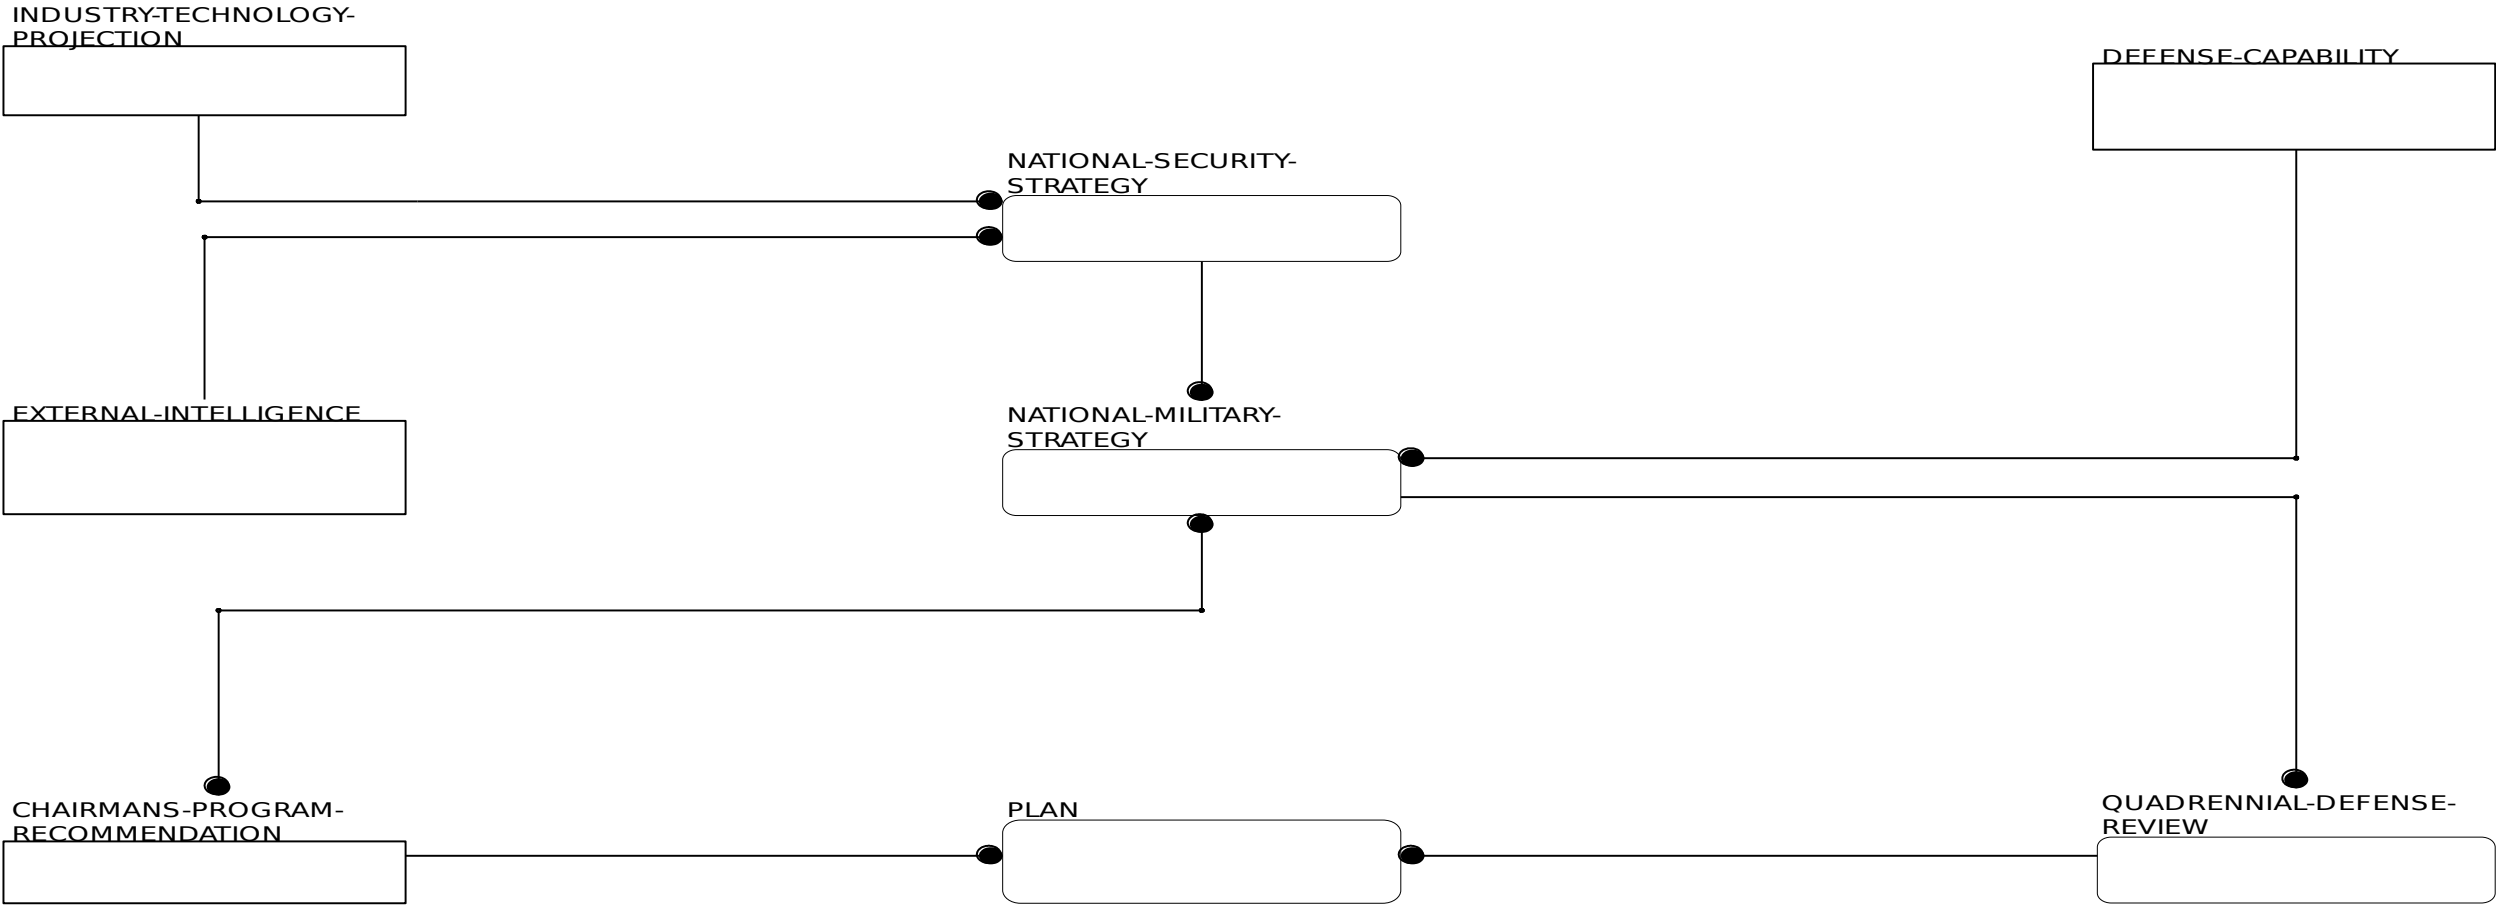

BMA - CV - 1.1 - Strategic Planning (OV-07
Logical Data Model Subject Area)
System Architect
Fri Mar 04, 2005 14:56

Comment

The Strategic Planning view develops strategic goals, objectives and the asociated products to achieve the organization's mission for a specified time period. These are reflected in strategic plans, capabilities, and assessments.

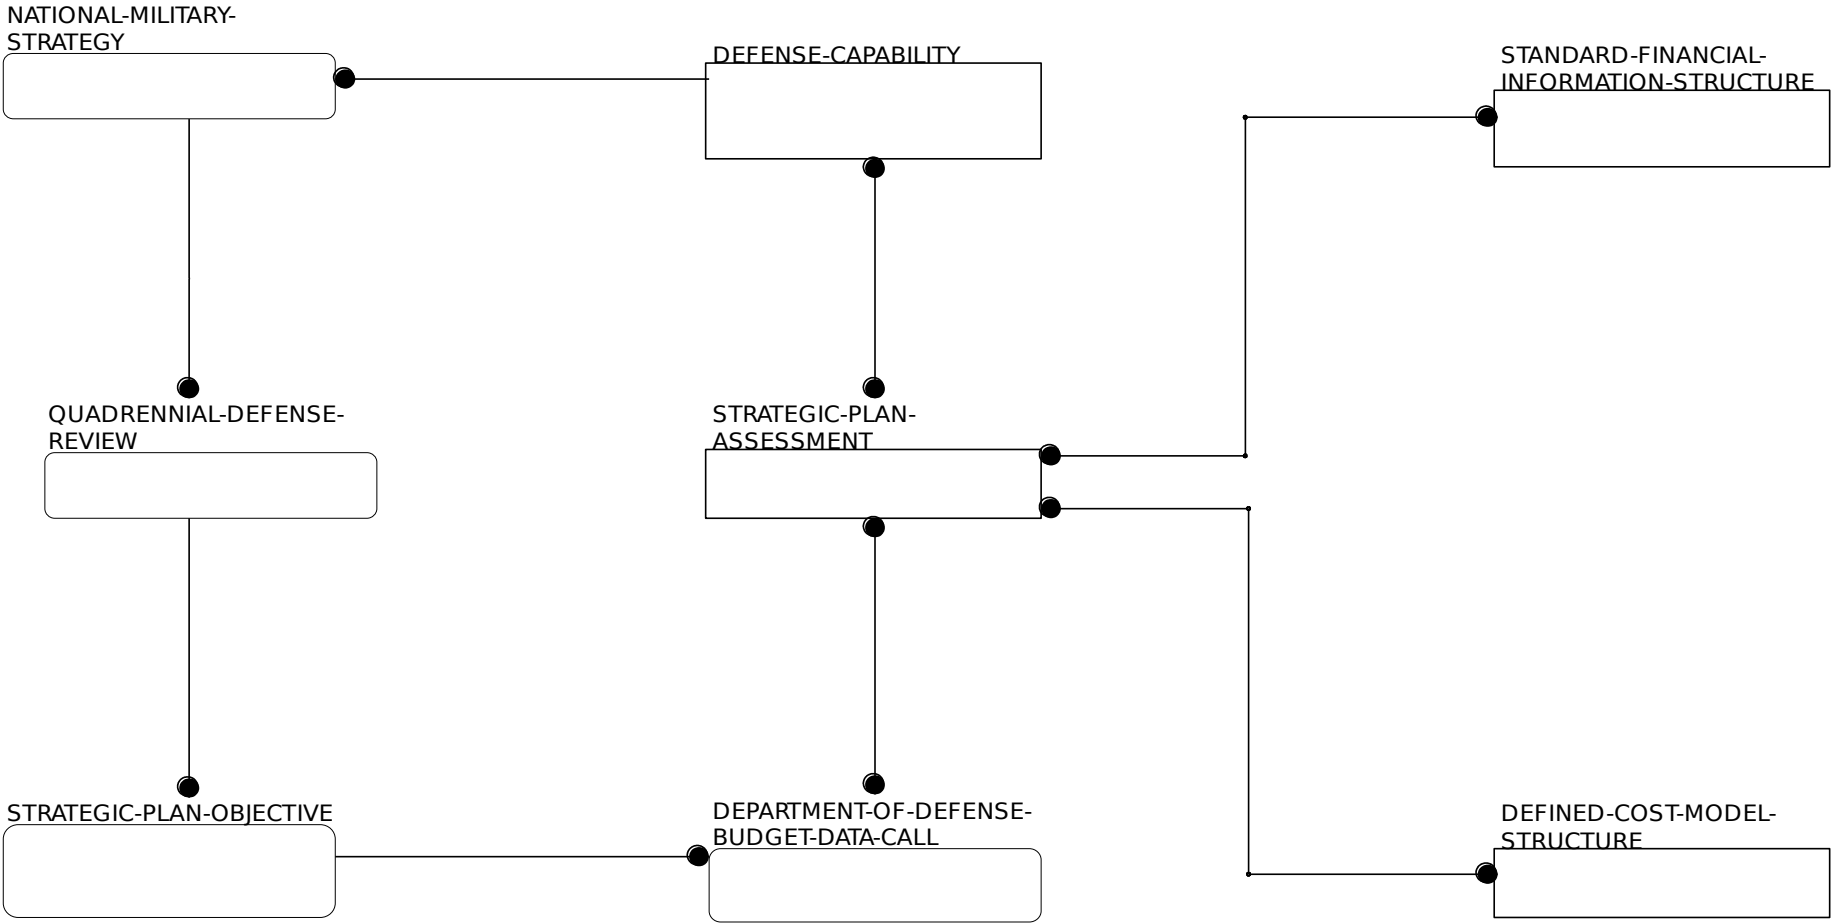

1.1 Strategic Planning

BMA - CV - 1.2 - Planning and Resource Guidance (OV-07 Logical Data Model Subject Area)
System Architect
Wed Mar 16, 2005 17:00

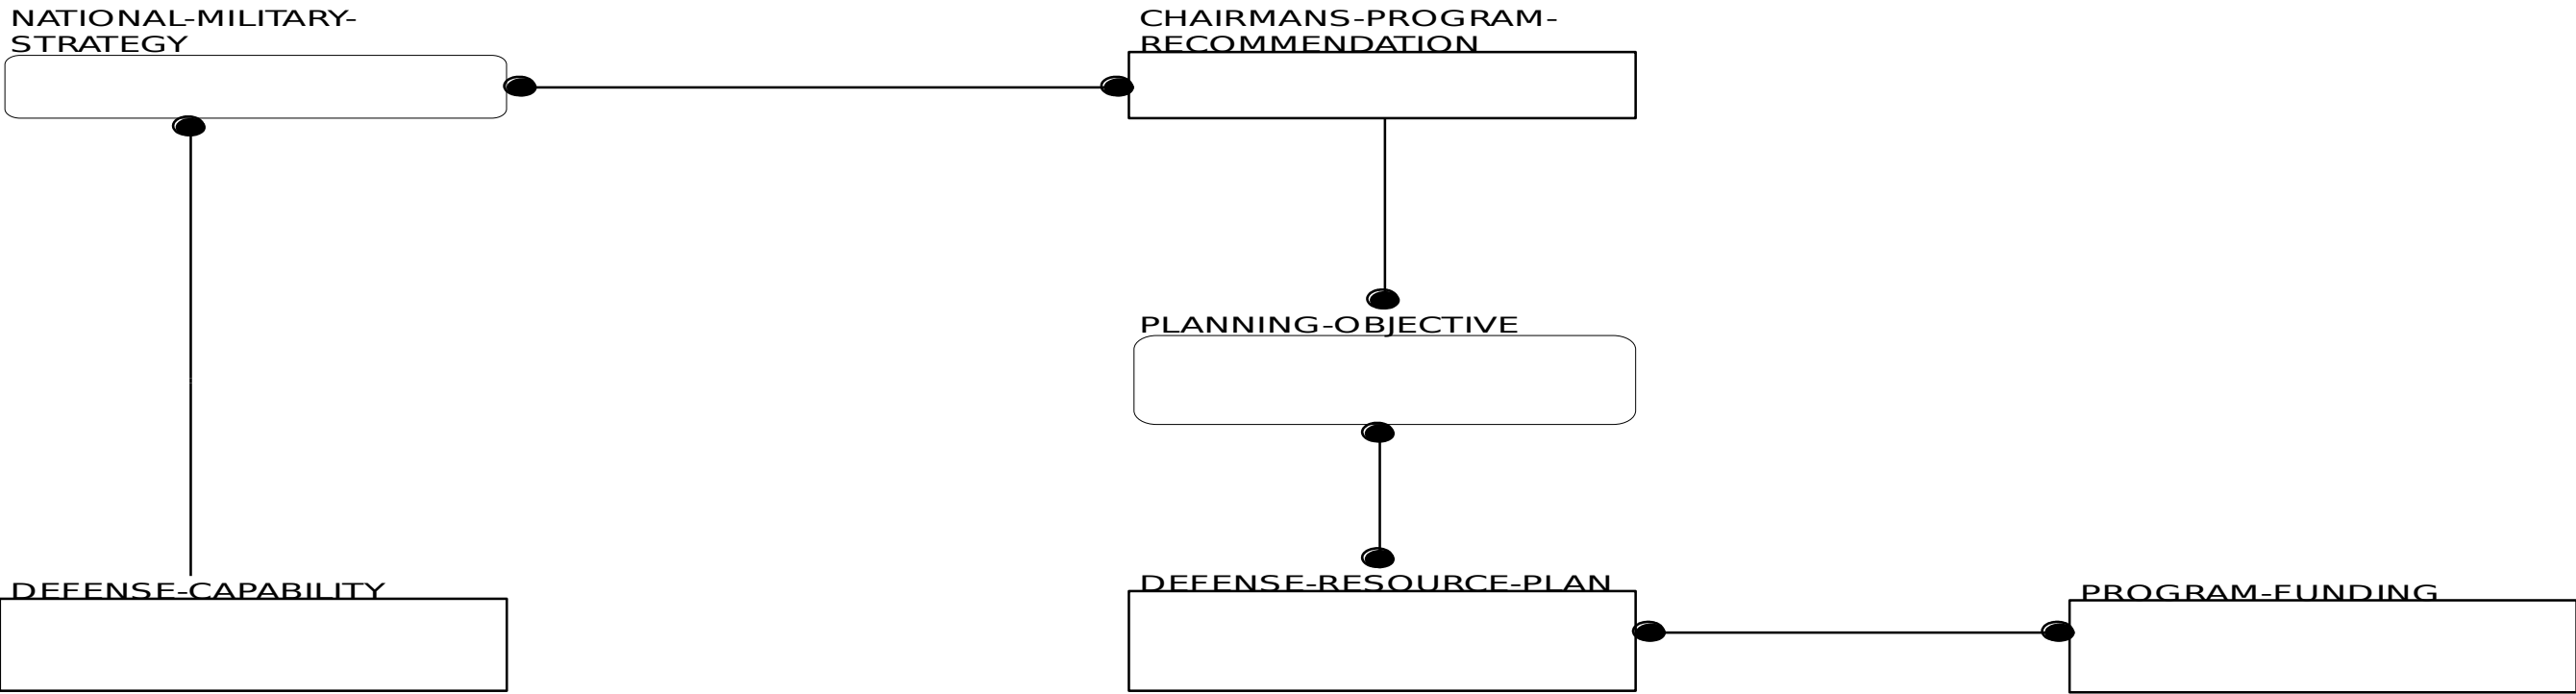

Comment
The Planning and Resource Guidance view produces direction or policy for the business activities based on the strategic goals and objectives

1. 2 Planning and Resource Guidance

	<div>BMA - CV - 1.3 - Program and Budget (OV-07 Logical Data Model Subject Area) System Architect Thu Mar 03, 2005 15:29</div>	
	<div>Comment</div> <div>The Program and Budget view generates and revises requisitions and implements buying contract/orders and sales contract/orders at all levels (contract, call, line item)</div>	

1.3 Program and Budget

	<div>BMA - CV - 1.4 - Resource and Performance Plan (OV-07 Logical Data Model Subject Area) System Architect Thu Mar 10, 2005 16:11</div>	
	<div>The Resource Performance Plan Development view translates strategic plans, guidance, and requirements into detailed plans to execute programs and to describe what business activities will be executed and what is the expected outcome. This also develops the resource and performance plan to achieve specific business operations and program goals, objectives, and performance. Plans are maintained and updated based upon receipt of the program and funding document, management reviews, fact of life changes, or contingency operations. Plans describe business programs in terms of performance levels, outcomes, and expected risks.</div>	

1. 4 Resource and Performance Plan

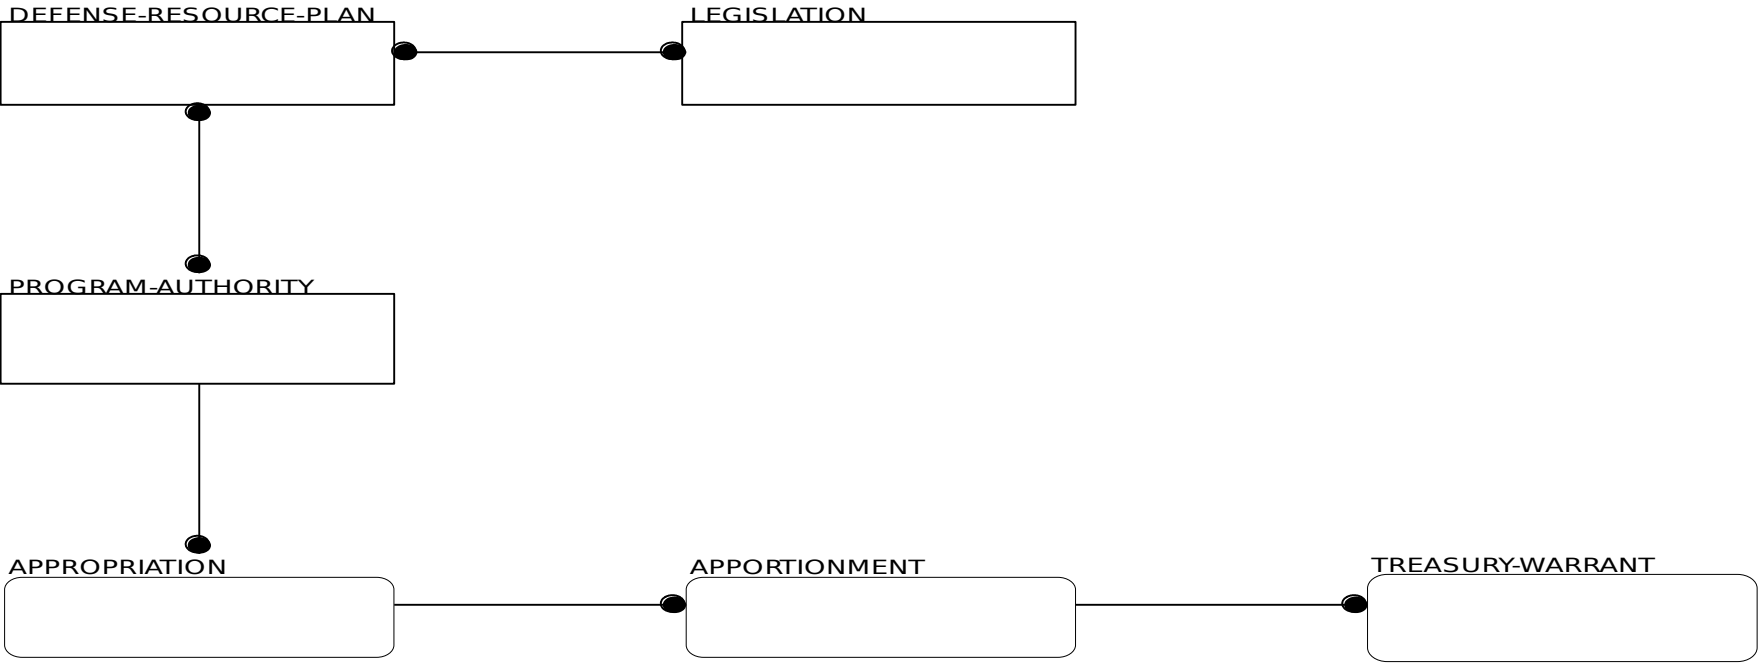

BMA - CV - 1.5 - Requirements Strategy (OV-07 Logical Data Model Subject Area) System Architect Thu Mar 17, 2005 11:50	
	Comment
The Requirement Strategy view assesses requirements and develops strategies to acquire or source these requirements, including forecasting costs, identifying risks, and any related selection or negotiation criteria.	

1. 5 Requirements Strategy

	<div>BMA - CV - 1.6 - Resource Allocation (OV-07 Logical Data Model Subject Area) System Architect Thu Mar 10, 2005 13:39</div>	
	<div>Comment</div> <div>The Resources Allocation view distributes approved DoD resources or adjustments (e.g., reprogramming and supplemental) within guidelines provided by statute, policy, and regulation. This includes distribution of resources from OSD to DoD components and subsequent distribution to lower echelon commands down to the lowest level designated. This comprises the process of allocating and sub-allocating reources, End Strength, and other targets.</div>	

1.6 Resource Allocation

	<div>BMA - CV - 2.0 - DoD Business Mission Monitor (OV-07 Logical Data Model Subject Area) System Architect Wed Mar 30, 2005 12:18</div> <div>Comment</div> <div>This view measures progress towards satisfying the strategic objectives of the Department of Defense Business Mission.</div>

2.0 DoD Business Mission Monitor

BMA - CV - 2.1 - Business Mission Monitor

	BMA - CV - 2.1 - Business Mission Monitor (OV-07 Logical Data Model Subject Area) System Architect Thu Mar 10, 2005 13:51	
	Comment The Business Mission Monitor view measures progress towards satisfying the strategic objectives of the Department of Defense Business Mission.	

2.1 Business Mission Monitor

	BMA - CV - 3.0 - Conduct Sourcing (OV-07 Logical Data Model Subject Area)
	System Architect Wed Mar 30, 2005 12:19
	Comment
	The Conduct Sourcing view identifies potential providers, solicitation strategies and establishes selection criteria, this view establishes sourcing vehicles, requests proposals, reviews bids, selects providers and issues contracts. This view also tracks, monitors and closes out contracts and ensures that vendors and/or service providers are meeting terms and conditions and other requirements. Finally, this view is responsible for executing acquisition business plans of Department of Defense by managing programs.

3.0 Conduct Sourcing

BMA - CV - 3.1 - Acquisition Strategy (OV-07 Logical Data Model Subject Area)

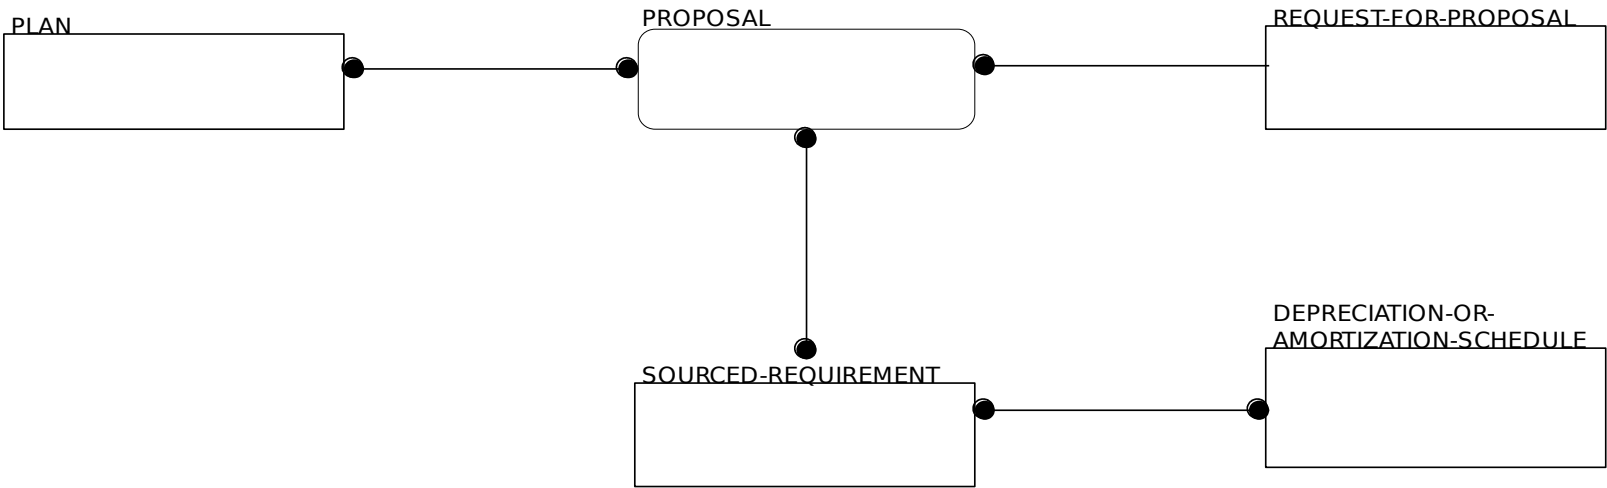

System Architect

Thu Mar 17, 2005 11:52

Comment

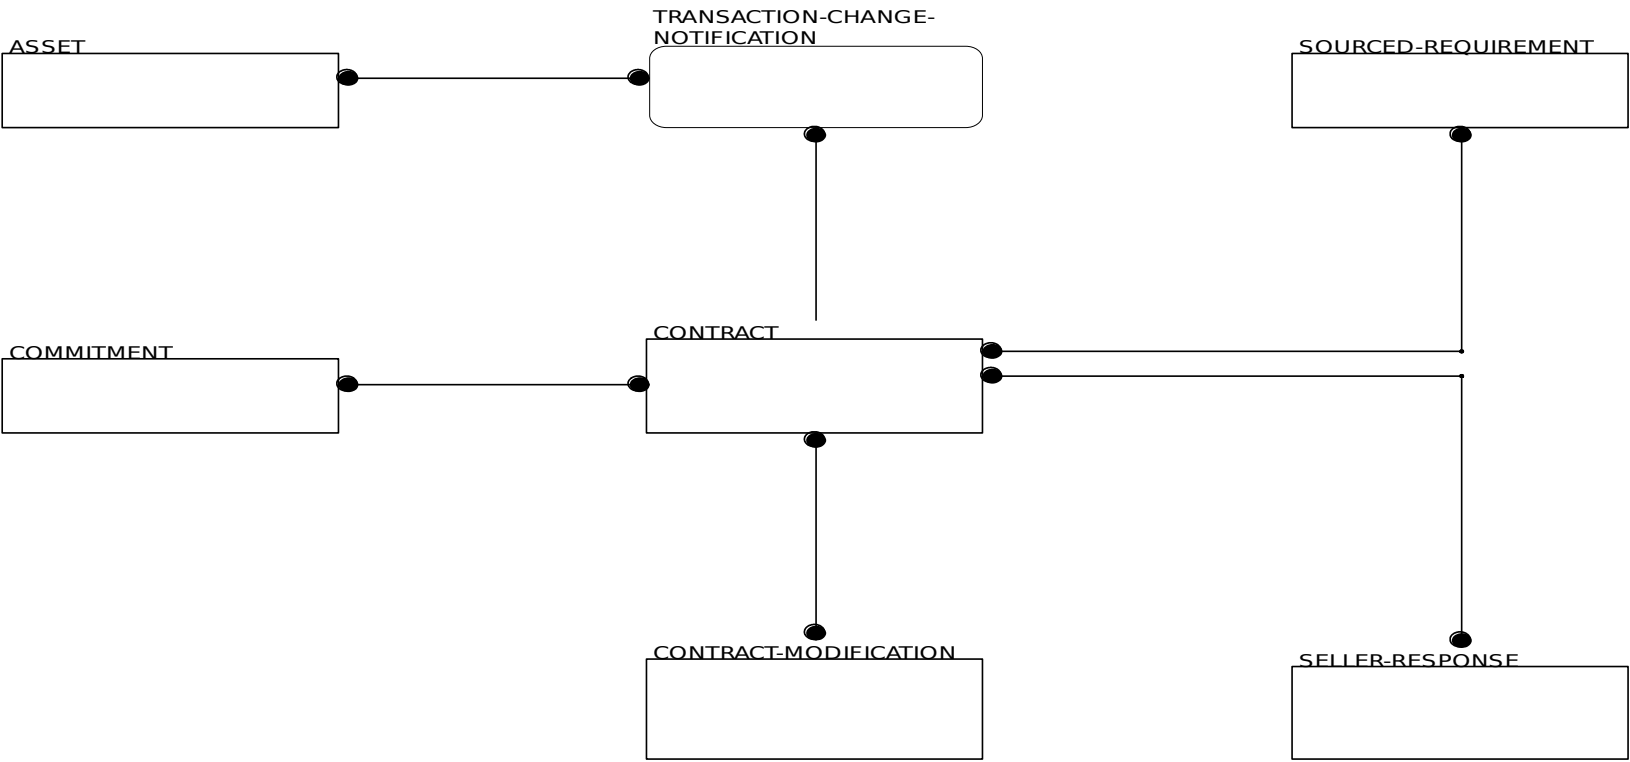

The Acquisition Strategy view matches requirements to existing Sourcing and/or Enterprise Contract/Agreements. Enterprise implies multiple vendor options whereas Sourcing is typically for a particular program/vendor (e.g. F18/Boeing). If a new Sourcing or Enterprise Contract/Agreement is required, the requirement to be fulfilled is communicated as a Solicitation, Request for Information, Request for Quote, or Request for Proposal. This view also includes the evaluation and/or negotiation of proposals resulting in the issuing of a Sourcing or Enterprise Contract/Agreement.

3.1 Acquisition Strategy

	BMA - CV - 3.2 - Sales and Procurement Operation (OV-07 Data Model Subject Area) System Architect Thu Mar 10, 2005 13:57	Logical
	Comment The Sales and Procurement Operation view relates to the generation and revision of requisitions and buying contract/orders and sales contract/orders at all levels (contract, call, line item).	

3.2 Sales and Procurement Operation

BMA - CV - 3.3 - Sales and Procurement Observation

3.3 Sales and Procurement Observation

BMA - CV - 3.4 - Program Management (OV-07 Logical Data Model Subject Area)

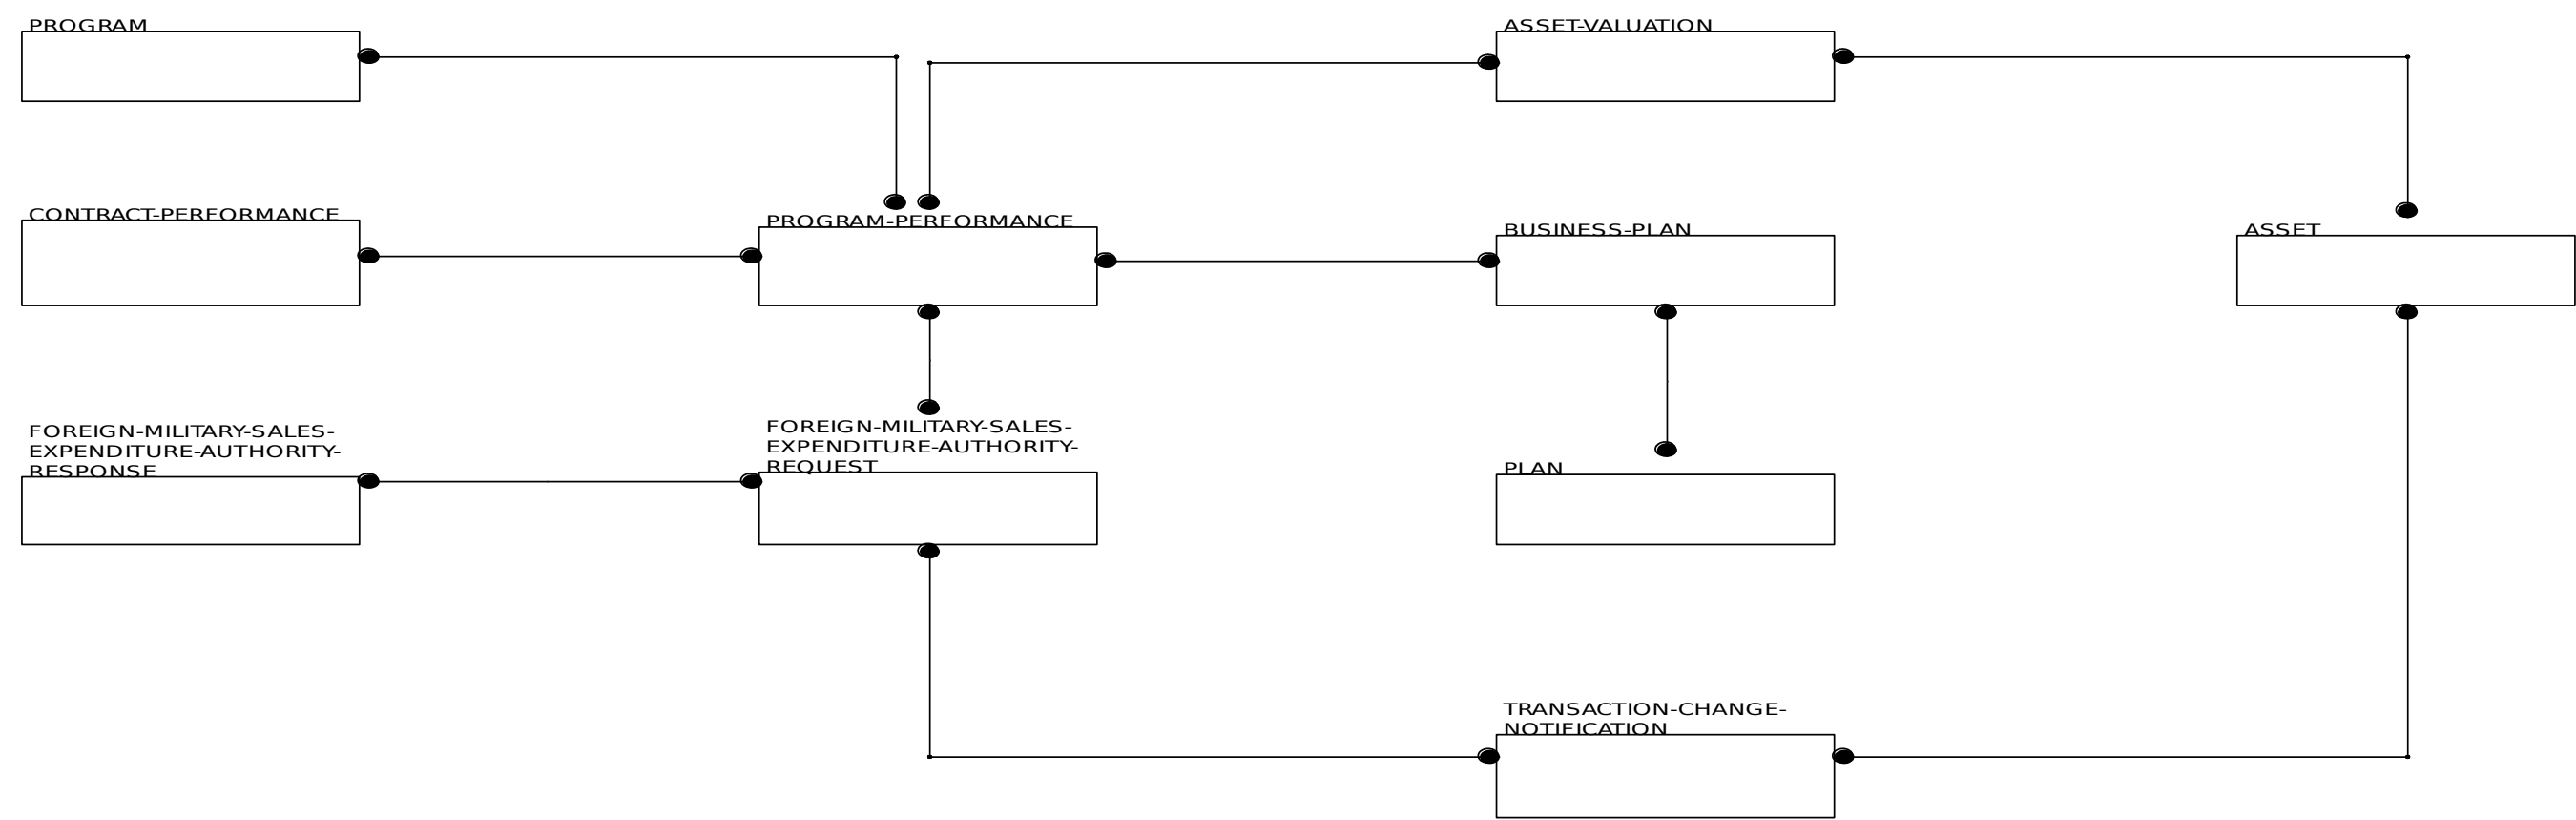

System Architect

Thu Mar 10, 2005 14:08

Comment

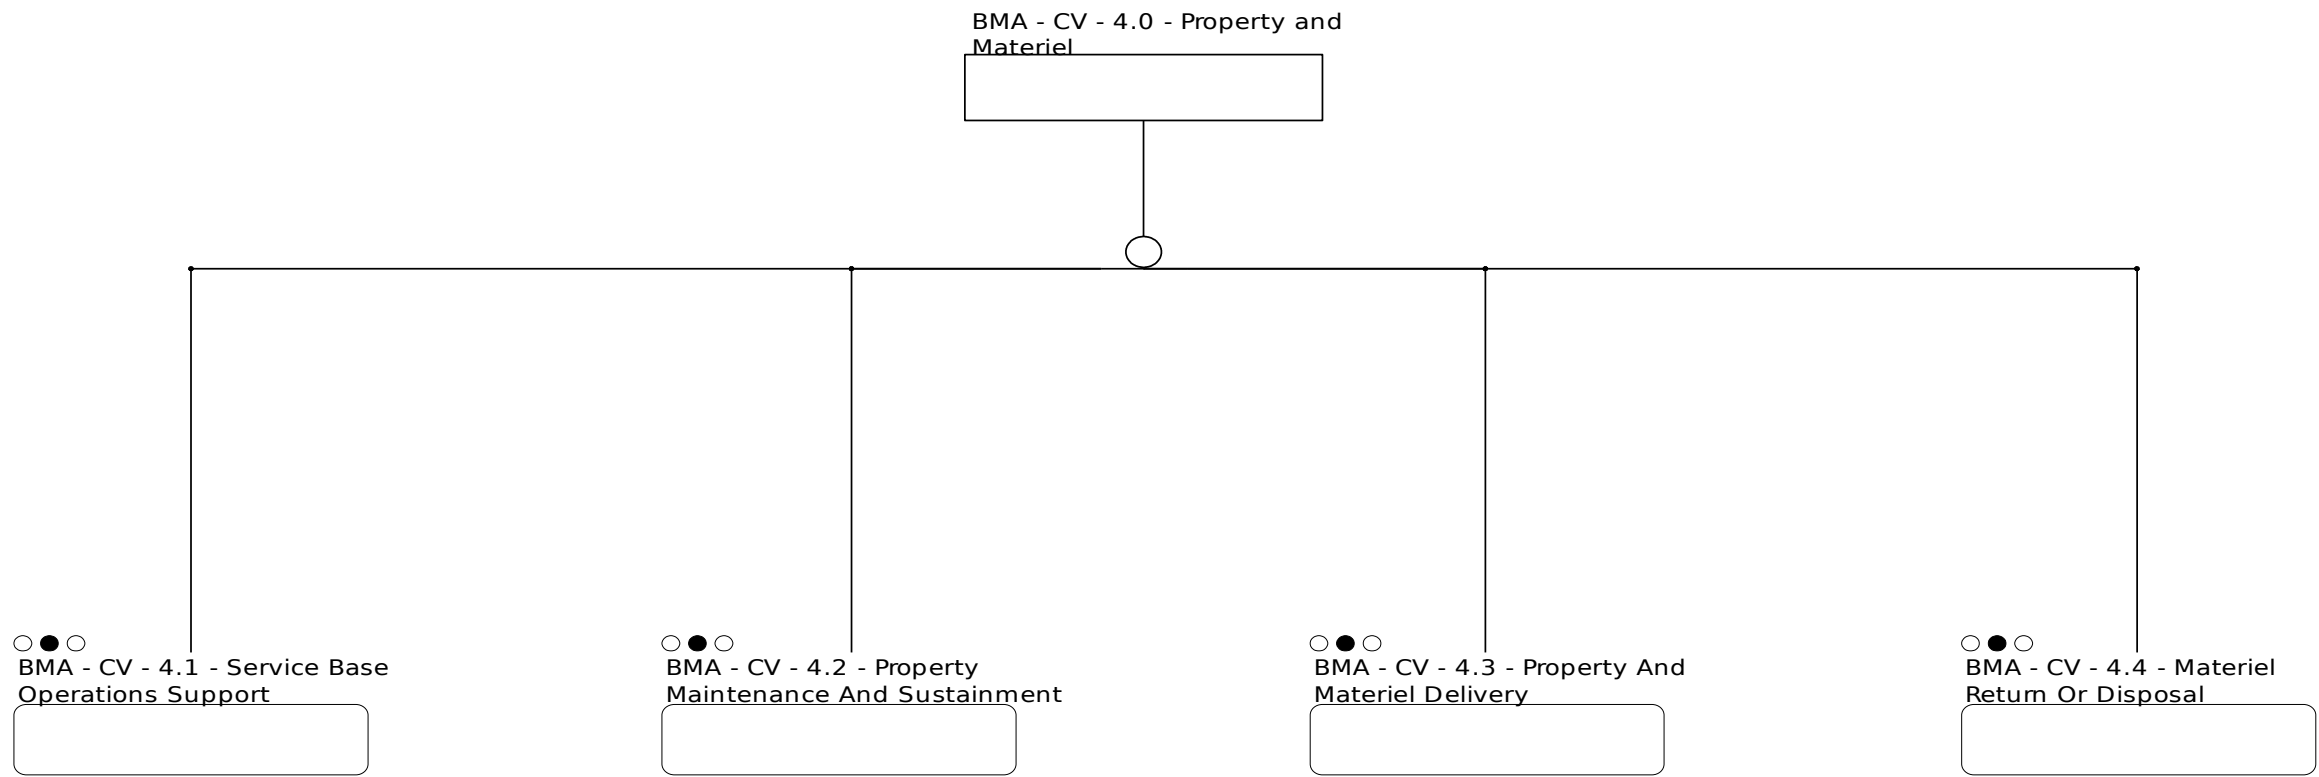

This view manages the elements of the program's resources and risk, integrates government and contractor efforts, and reports program status and issues.

3.4 Program Management

	BMA - CV - 4.0 - Property And Materiel (OV-07 Logical Data Model Subject Area) System Architect Wed Mar 30, 2005 12:21	
	Comment The Manage Property and Materiel view identifies all the processes associated with the management and movement of materiel and assets throughout the lifecycle from procurement/acquisition, production, end use, maintenance/sustainment to final disposition.	

4.0 Property And Materiel

BMA - CV - 4.1 - Service Base Operations Support (OV-07 Logical Data Model Subject Area)

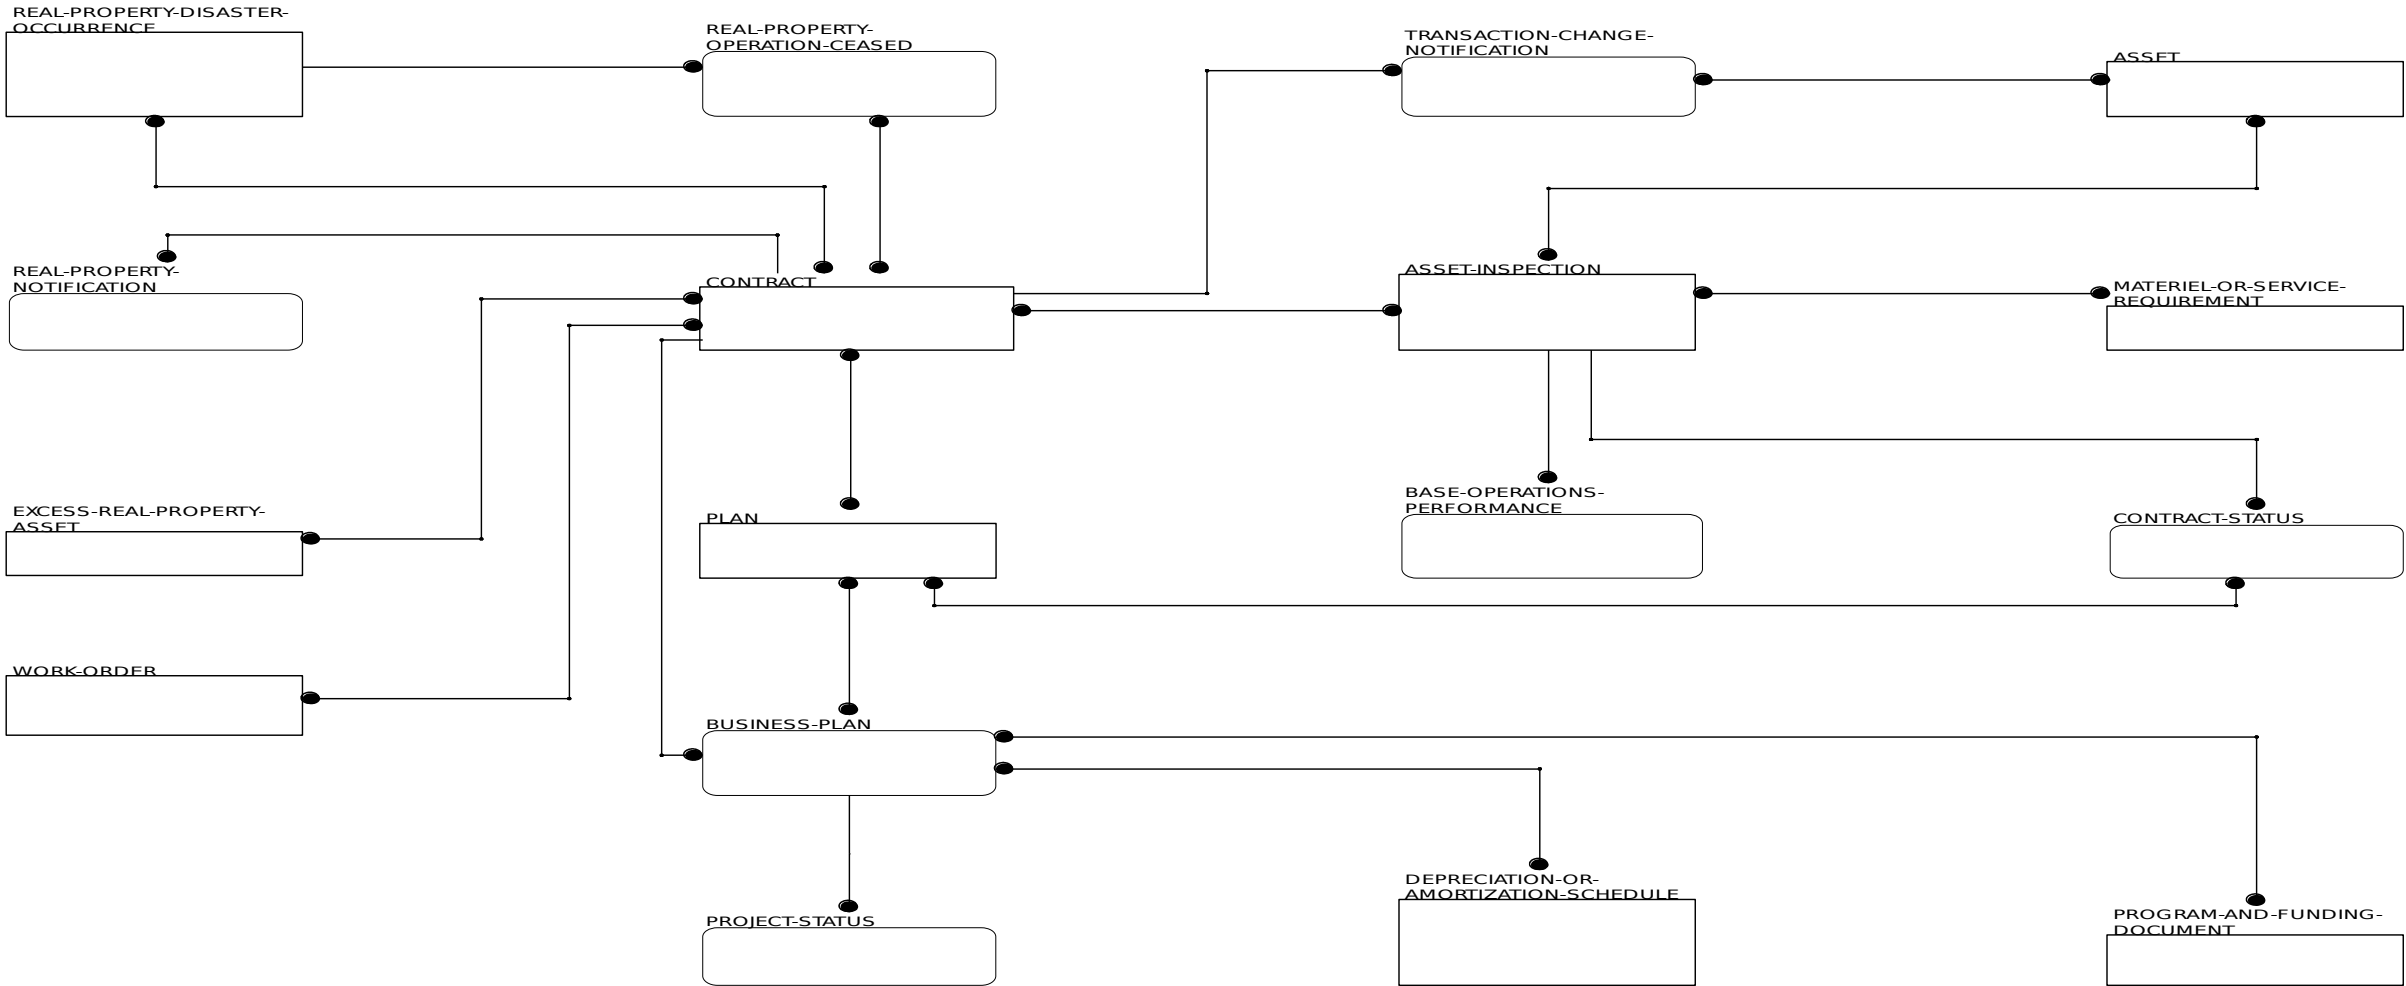

System Architect

Thu Mar 10, 2005 14:34

Comment

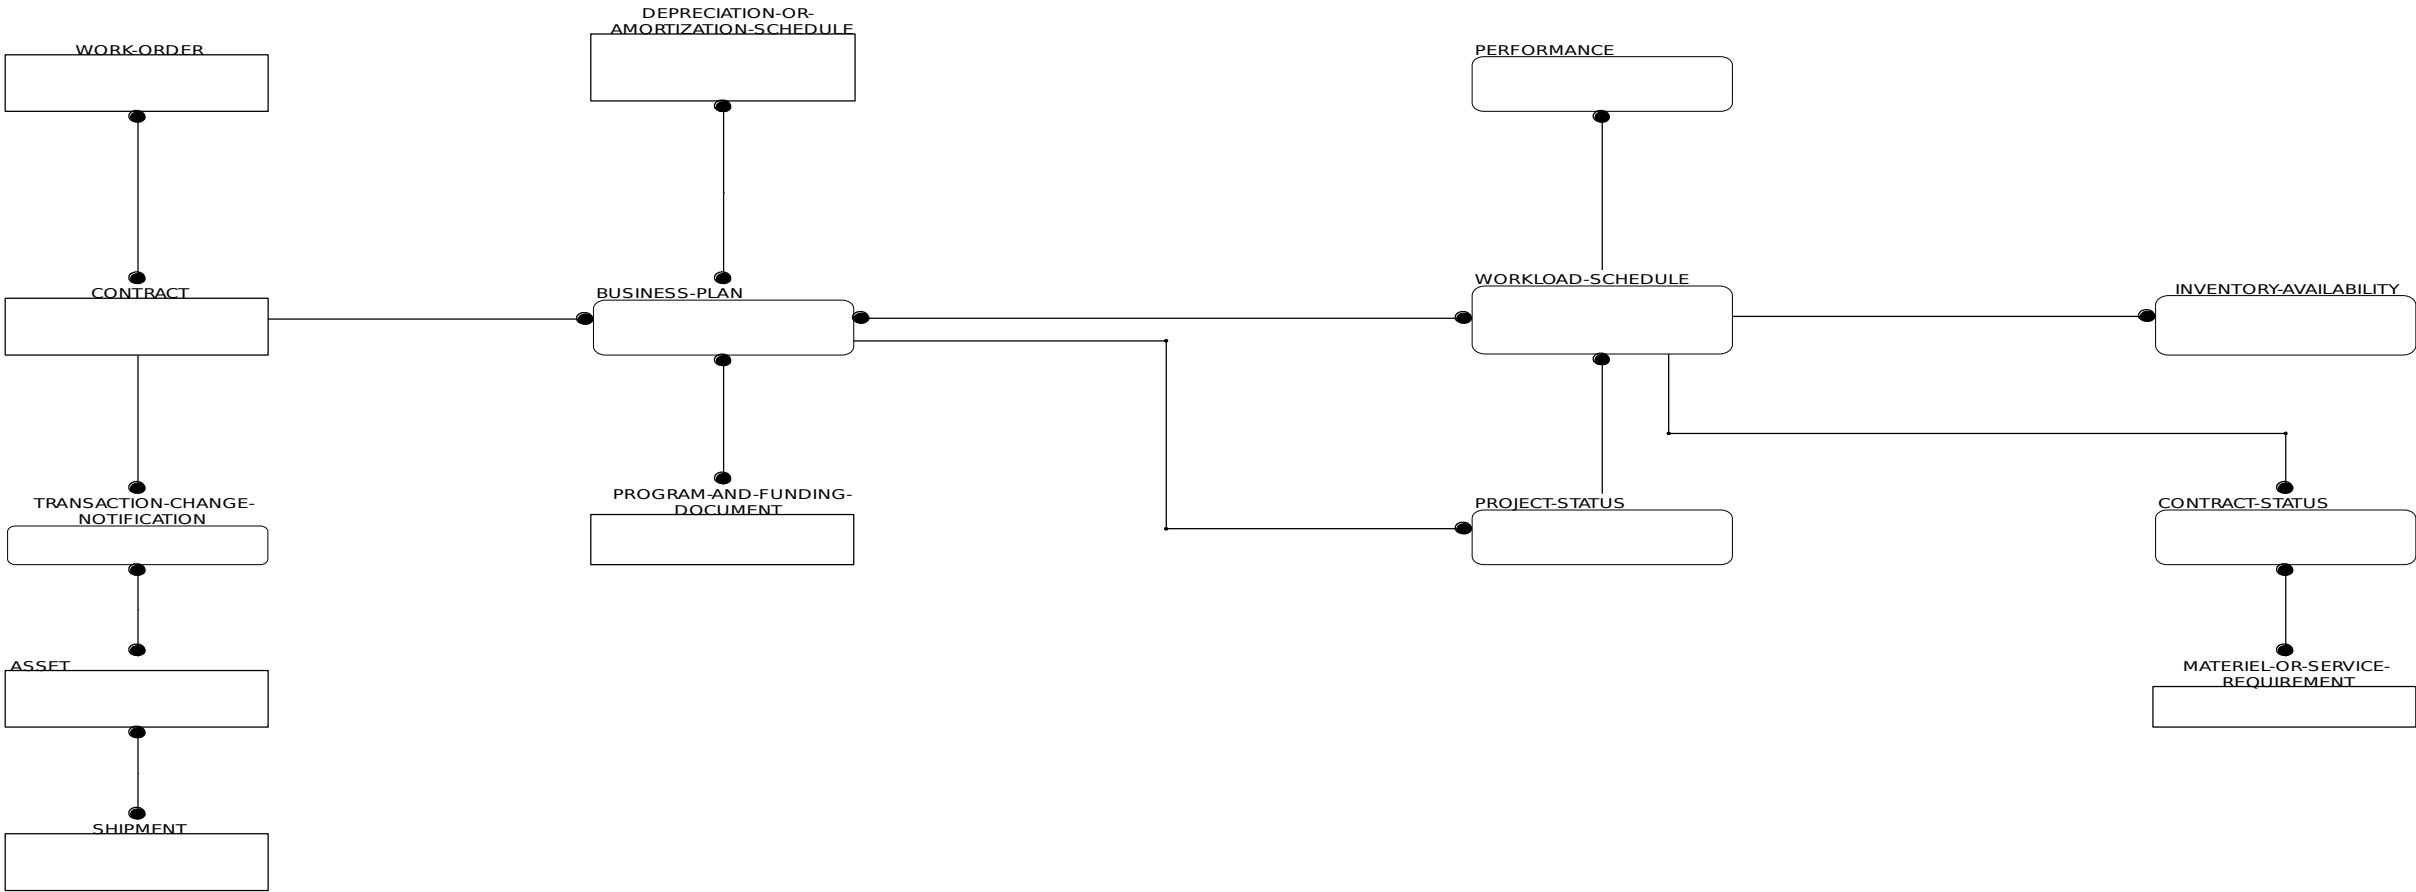

This view provides information to support activities that send goods and equipment back into the supply chain when they are received in error, in excess of required quantities, or defective obsolete, damaged, or worn rendering them no longer useful in their current condition. This subject area also includes information to support the activity for the disposal of real property by demolition or transfer.

4.1 Service Base Operations Support

	BMA - CV - 4.2 - Property Maintenance And Sustainment (OV-07 Logical Data Model Subject Area) System Architect Wed Mar 16, 2005 14:55	
	Comment The Property Maintenance and Sustainment view provides information to support activities associated with developing Plant Property and Equipment assets, maintaining them in standard working condition, and extending their capacity, capability, or useful life. Examples of these activities include construction of buildings and facilities and production of equipment, as well as repair, overhaul, restoration, and modernization of these assets.	

4.2 Property Maintenance And Sustainment

BMA - CV - 4.3 - Property And Materiel Delivery (OV-07 Logical Data Model Subject Area)

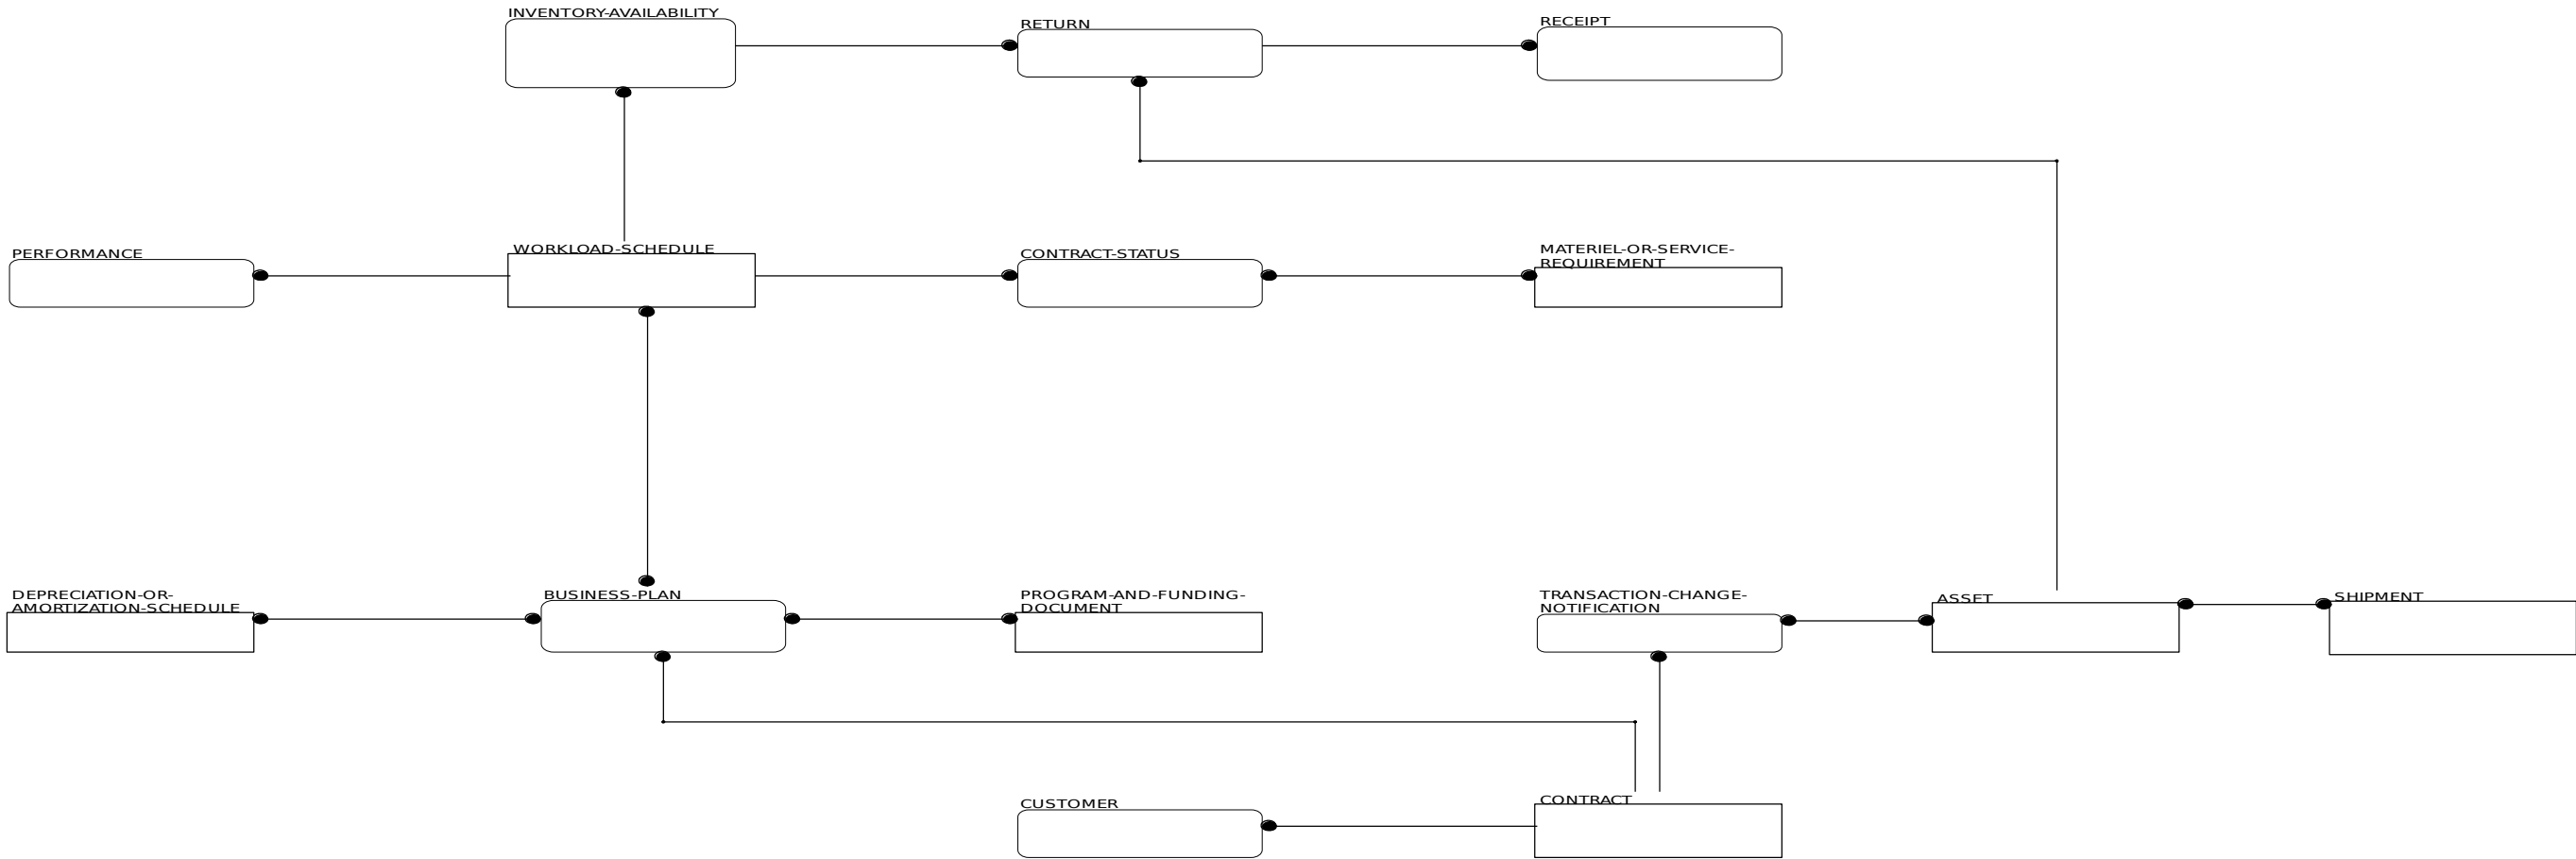

System Architect

Thu Mar 17, 2005 11:48

Comment

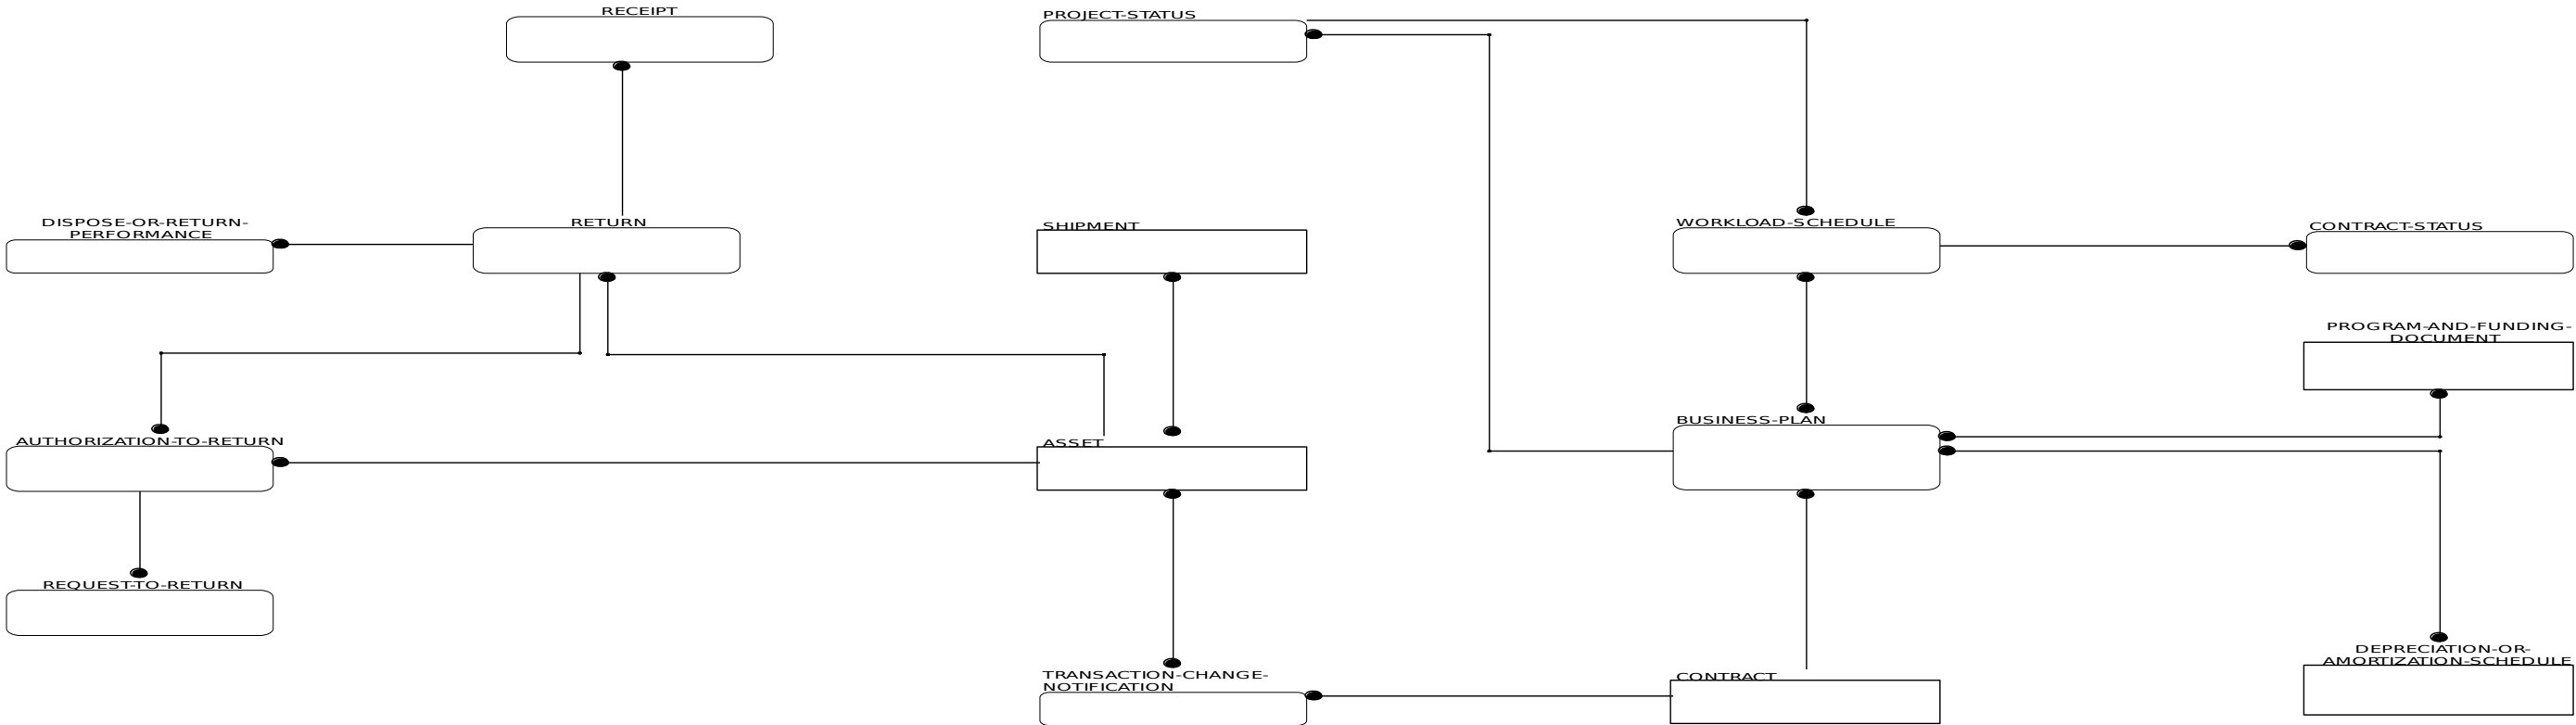

The Property and Materiel Delivery view provides information to support activities to satisfy the needs of internal and external customers, as evidenced by orders (i.e. requisitions, purchase orders or contracts), by issuing or transporting inventory and related materials, or capital equipment. Materiel and equipment come under control of the Deliver activity when they are received at the warehouse. The Deliver activity is triggered when an inquiry or order is received from a customer. It includes the care and custody of the goods, picking orders, arranging transportation and issuing or shipping the goods. The Deliver activity is complete when the goods have been received by the consignee, acknowledged and invoiced, and the intransit record has been cleared.

4.3 Property and Materiel Delivery

	BMA - CV - 4.4 - Materiel Return Or Disposal (OV-07 Logical Data Model Subject Area) System Architect Wed Mar 16, 2005 16:30 -- Comment --	
	The Materiel Return or Disposal view provides information to support activities that send goods and equipment back into the supply chain when they are received in error, in excess of required quantities, or defective obsolete, damaged, or worn rendering them no longer useful in their current condition. This subject area also includes information to support the activity for the disposal of real property by demolition or transfer.	

4.4 Materiel Return Or Disposal

	BMA - CV - 5.0 - Environment Safety and Occupational Health (OV-07 Logical Data Model Subject Area)	
	System Architect Wed Mar 30, 2005 12:23	
	Comment	
	<p>The Perform Environment, Safety and Occupational Health Service view refers to distinct business areas within DoD that address environmental quality, restoration, range sustainability, occupational health, safety. While each program within these business areas operates in accordance with specific laws, regulations, DoD guidance, service level guidance and best practices, there are sets of common activities operating across these areas. Common activities include identifying and understanding the environment, safety, health or readiness issue, risk assessment, developing solutions, implementing solutions, developing agreements and the conduct of monitoring. Specific business areas addressed are Compliance;the area of environmental management that ensures effective and efficient compliance with existing Federal, host nation, state and local environmental laws and regulations, Pollution Prevention (P2); which seeks to eliminate or reduce pollution at its source and promote recycling. P2 programs are the preferred means of achieving environmental compliance, protecting human health and reducing the use of hazardous materials, and decreasing the volume of solid waste. Conservation; which balances the responsibility of protecting cultural and natural resources with the requirements of military mission support.. Clean-up/Restoration;the identification, investigation, research and development, and cleanup of contamination from hazardous substances, pollutants and contaminants and the correction of other environmental damage such as detection and disposal of unexploded ordnance (UXO), which creates an imminent and substantial endangerment to the public health or welfare or to the environment, Safety; which ensures that the Warfighter and the supporting personnel work in an environment that is free from occupational hazards such as improper machine operation, faulty equipment, and other safety related issues, and Occupational/Environmental Health; which ensures that the Warfighter, supporting personnel, and other stakeholders are protected from various health issues that can arise during normal operations.</p>

5.1 Environmental Safety and Occupational Health

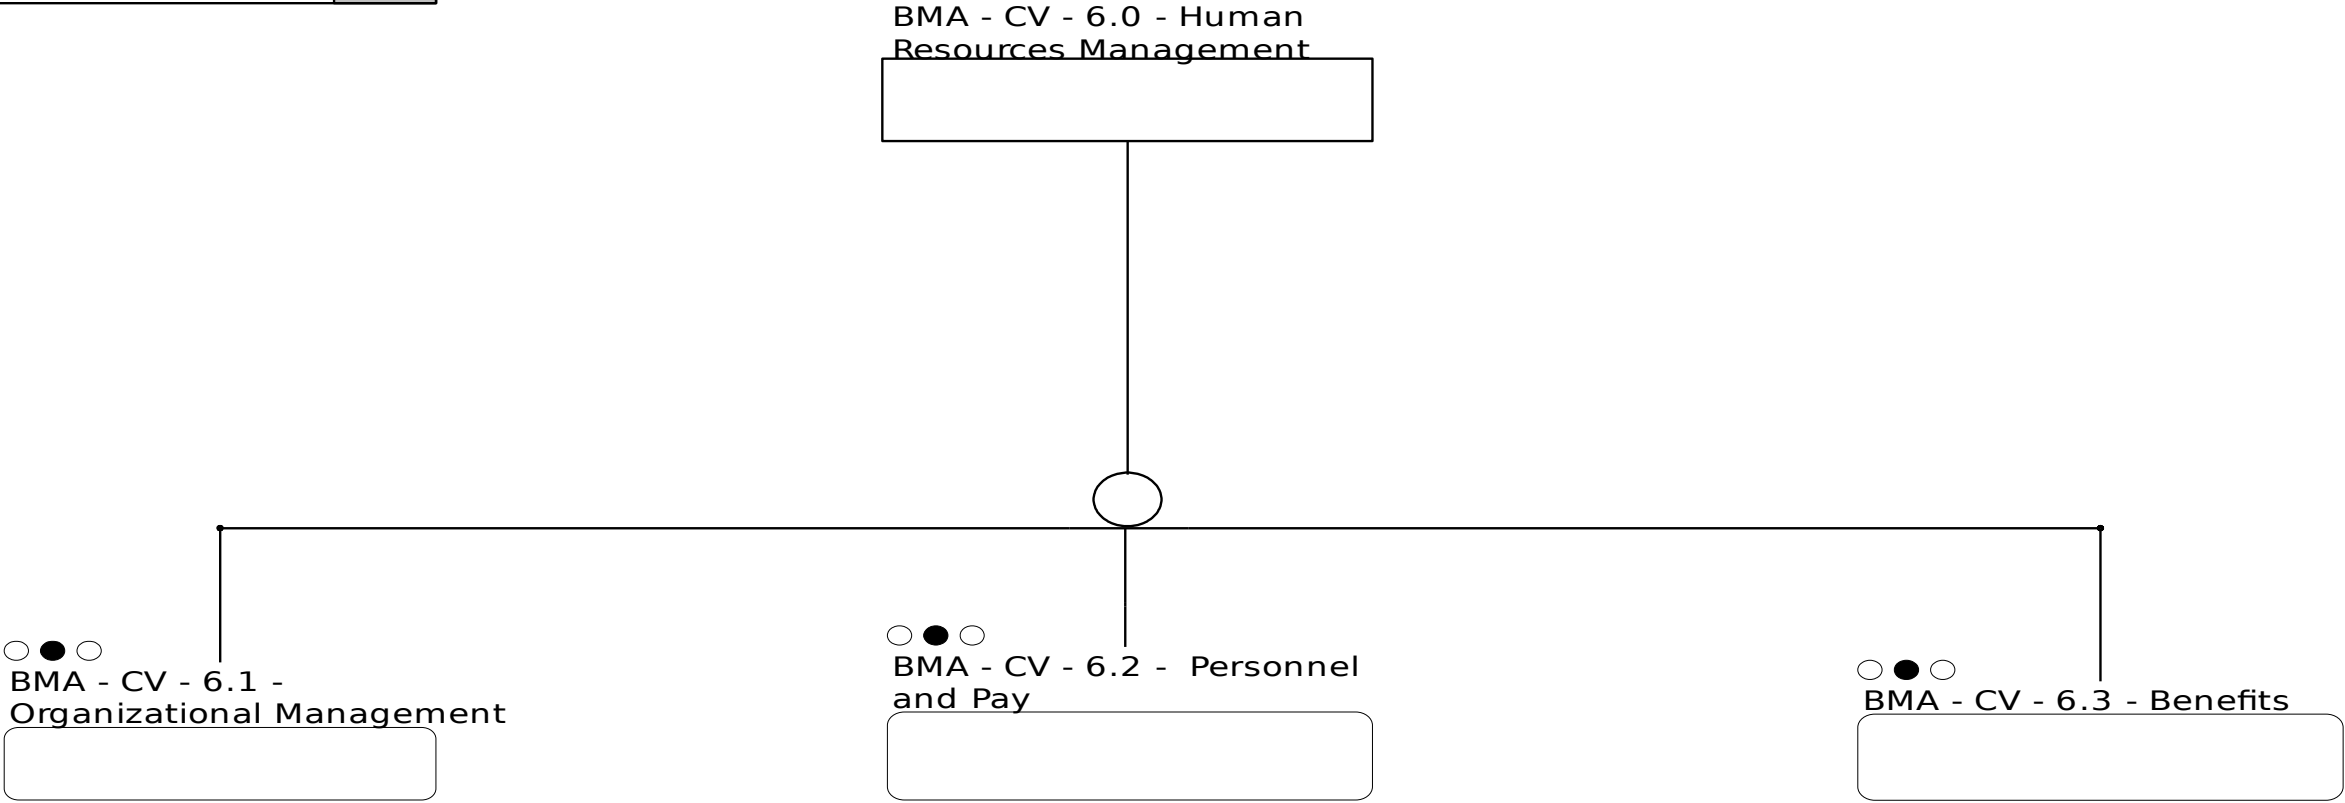

BMA - CV - 6.0 - Human-Resources-Management (OV-07 Logical Data Model Subject Area)
System Architect
Wed Mar 30, 2005 12:23

-Comment

The Human Resources view informs all activities associated with entry to/exit from the organization; career development and management; benefits, travel and pay management; and execution of human resource policies, procedures and employee information management.

6.0 Human Resources

BMA - CV - 6.1 - Organizational Management (OV-07 Logical Data Model Subject Area)

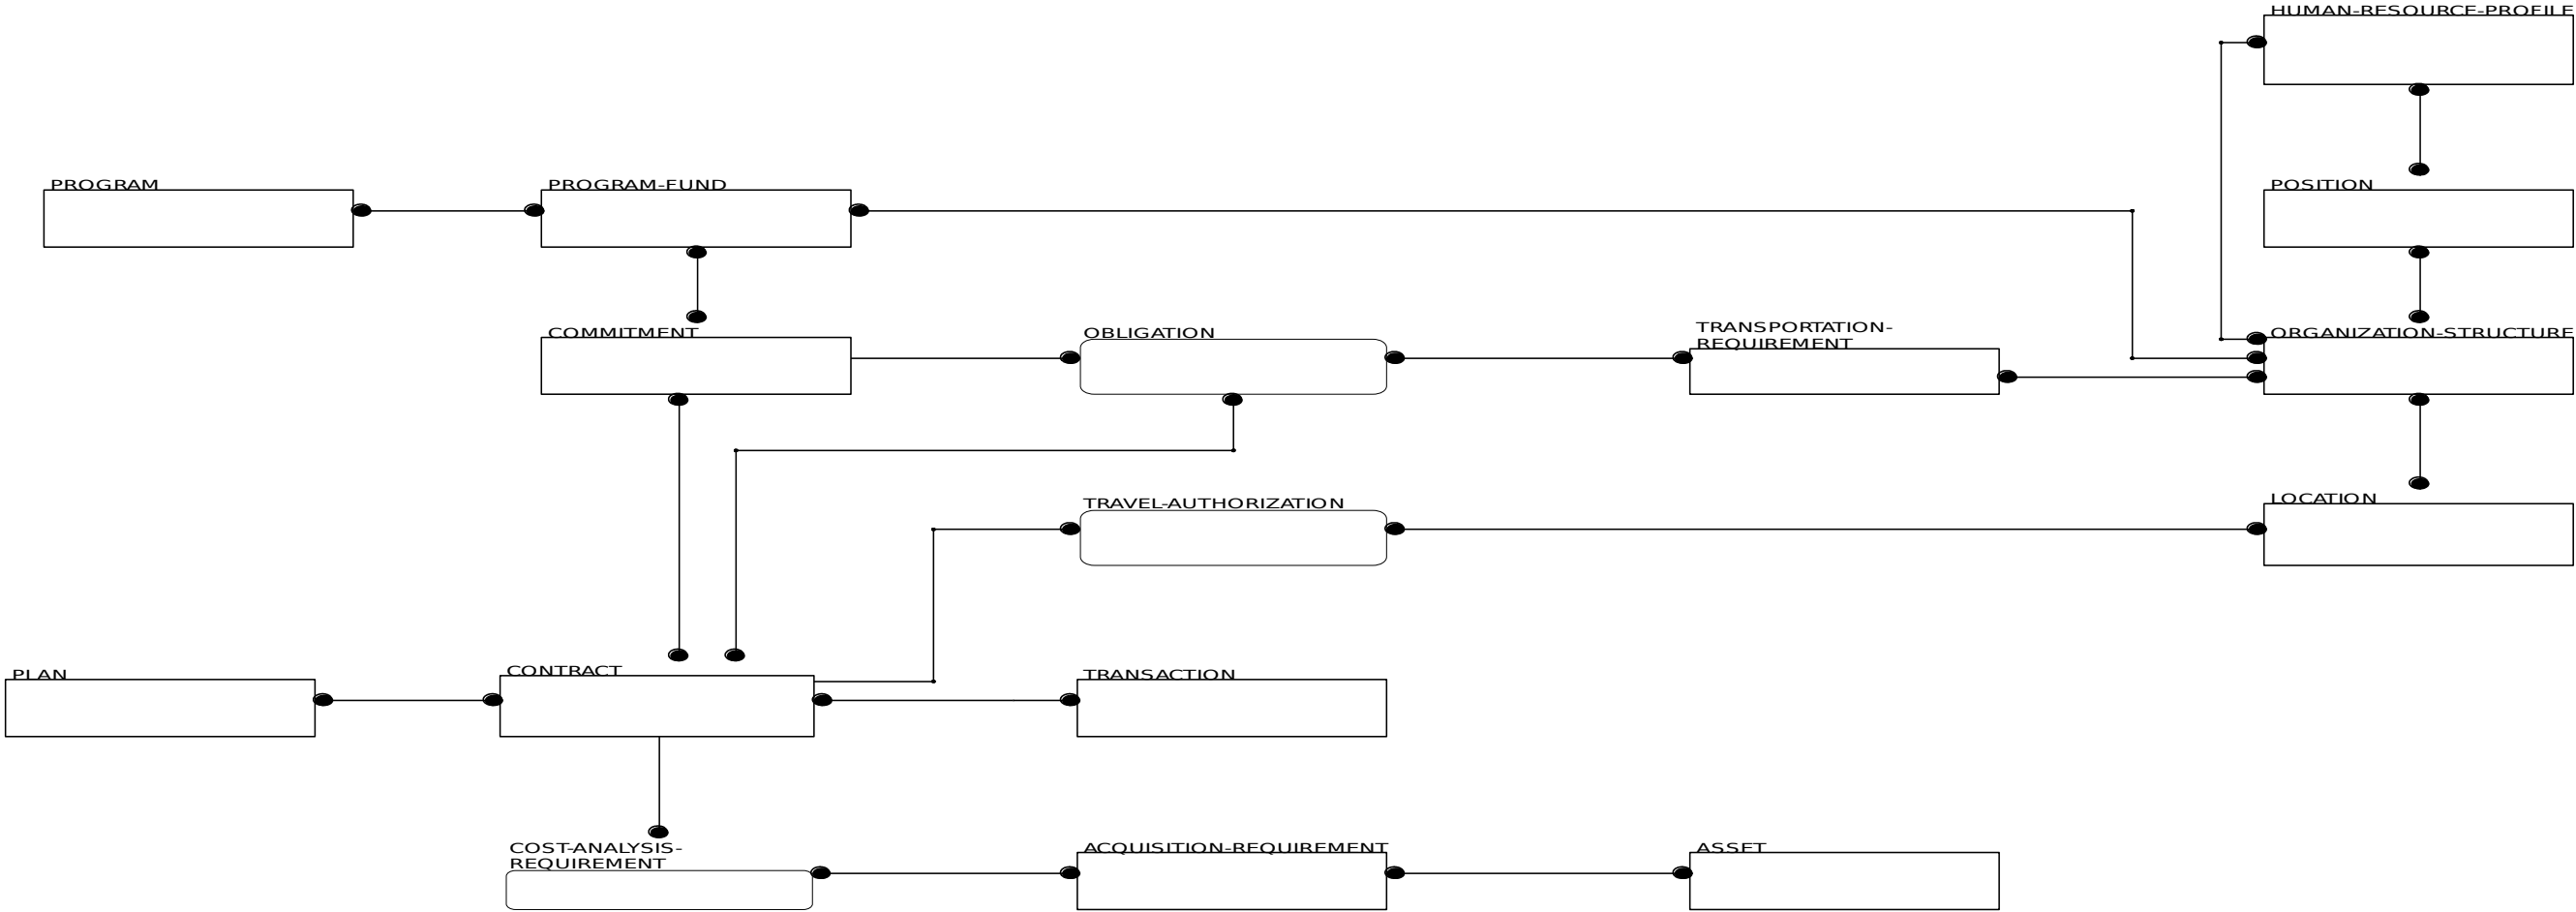

System Architect

Thu Mar 10, 2005 15:27

Comment

The Organizational Management view encompasses all activities associated with managing the human resources infrastructure for Department of Defense (DoD) organizations. This infrastructure supports DoD legal programs, law enforcement programs, individual travel and organizational structures with position specifications. This activity includes managing the implementation of DoD mission plans by formulating force structure, strength projections, accession targets and distributing peacetime authorizations and wartime requirements.

6.1 Organizational Management

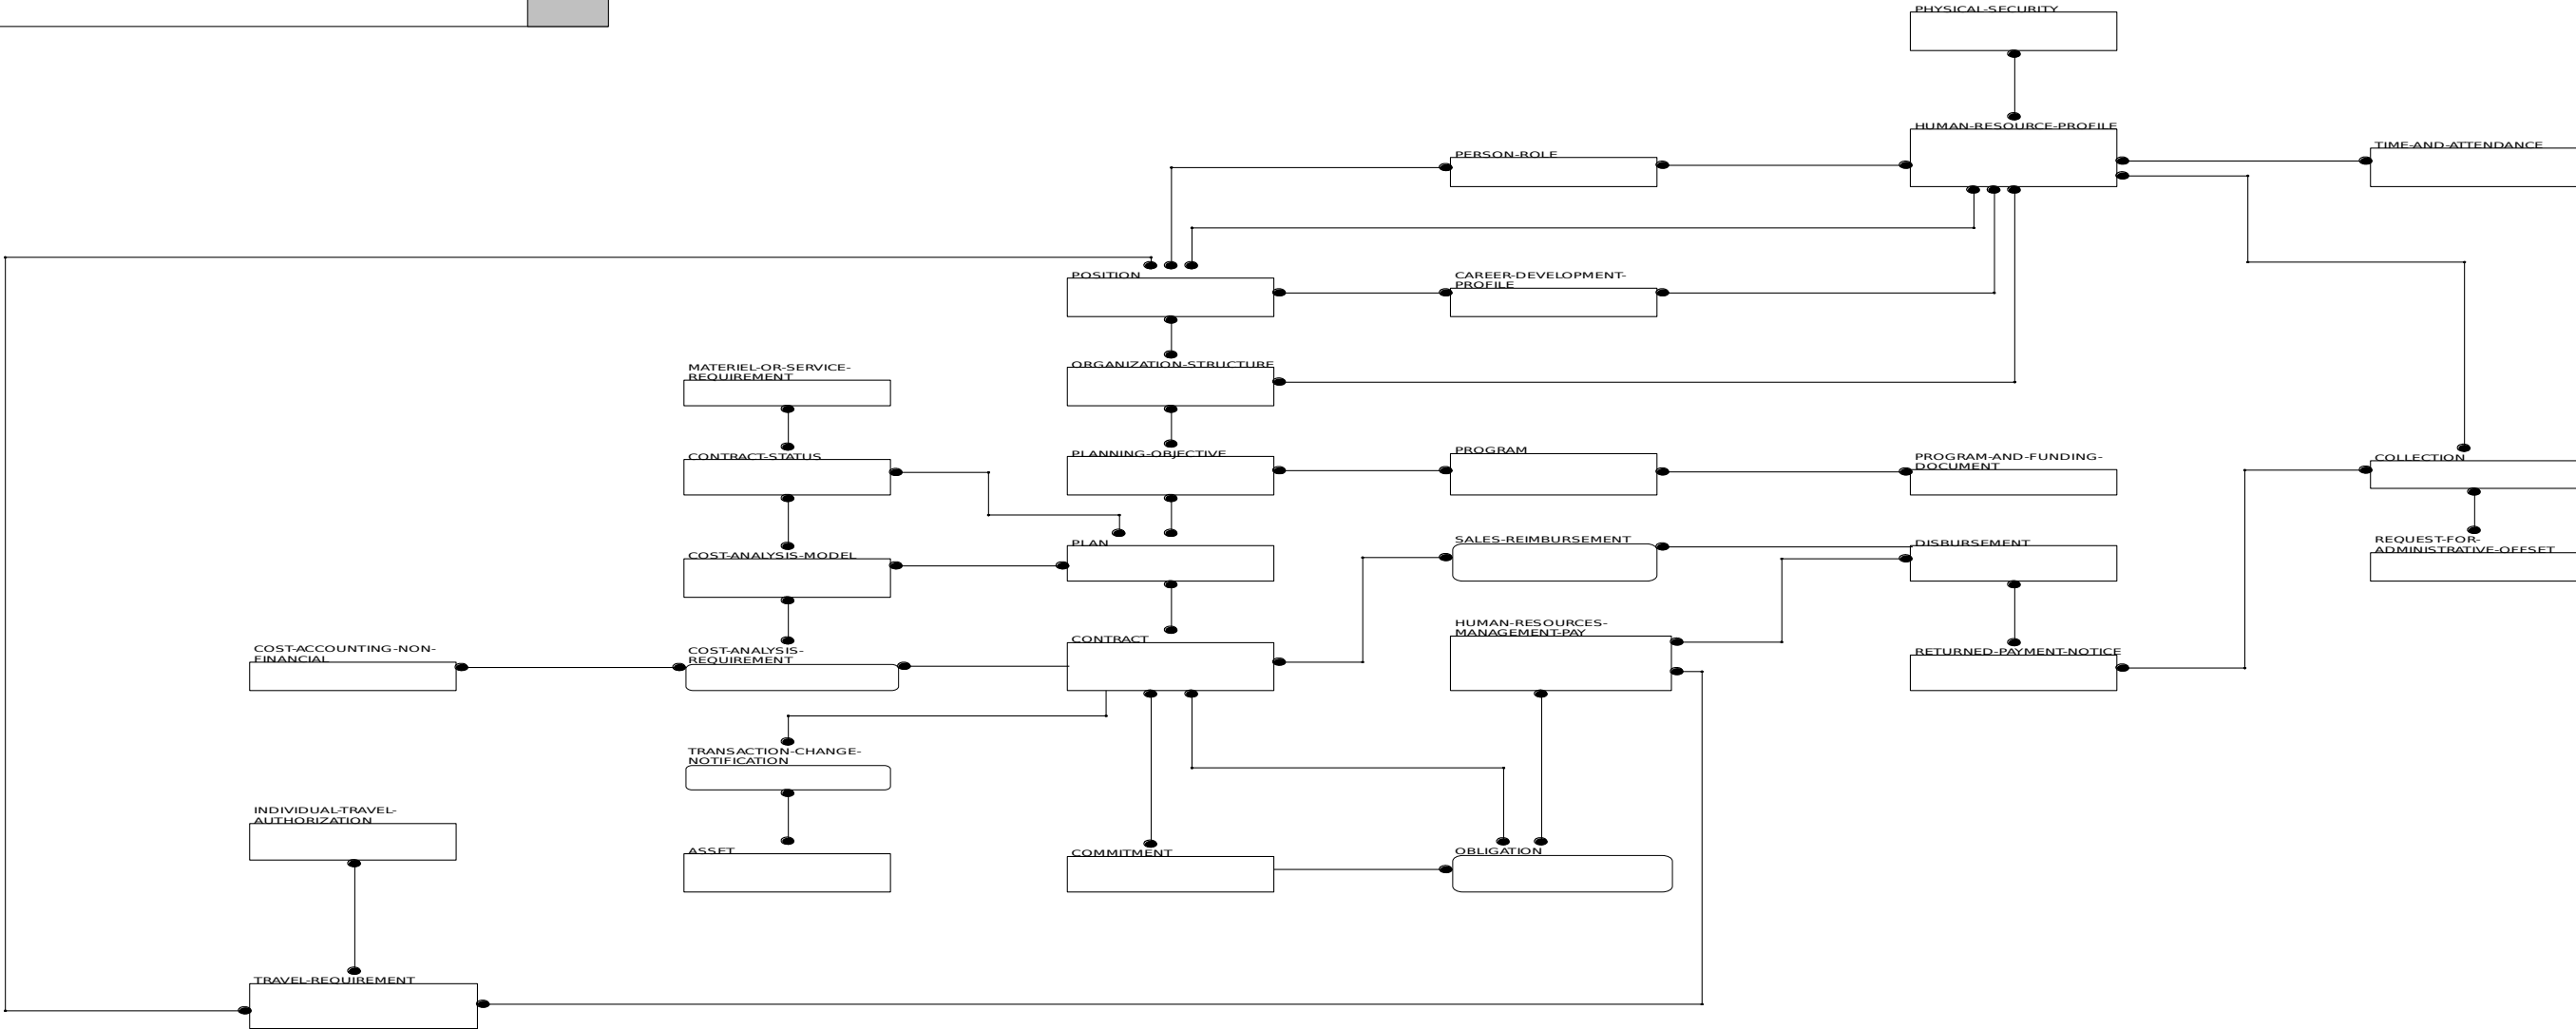

BMA - CV - 6.2 - Personnel And Pay

BMA - CV - 6.2 - Personnel And Pay (OV07 Logical Data Model Subject Area)
System Architect
Wed Mar 16, 2005 16:55

Comment:

The Personnel and Pay view encompasses all activities associated with entry to/exit from the organization; profile record management; career development and management; execution of human resources policies, procedures, and employee information (profile record and workforce communication management); and administering, authorizing and calculating pay. This activity includes the following: access, recruitment, strength management, placement and assignment, position fill management, classification, budget justification, resource utilization projection, adverse action, personnel action, social actions (including Equal Employment Opportunity programs), personnel administration support, personnel security investigations and clearances, time and attendance tracking, human resource reporting, transition of member/employee, education, training and development, Competency management, performance review and administration (including the promotion process). This also includes: compensation planning, compensation administration, compensation data management, and entitlements, pay authorization and calculation, pay adjustments, allotments, bonds, garnish and offsets, Thrift Savings Plan calculation, payroll and tax reporting, travel pay and other reimbursements.

6.2 Personnel and Pay

BMA - CV - 6.3 - Benefits (OV-07 Logical Data Model Subject Area)

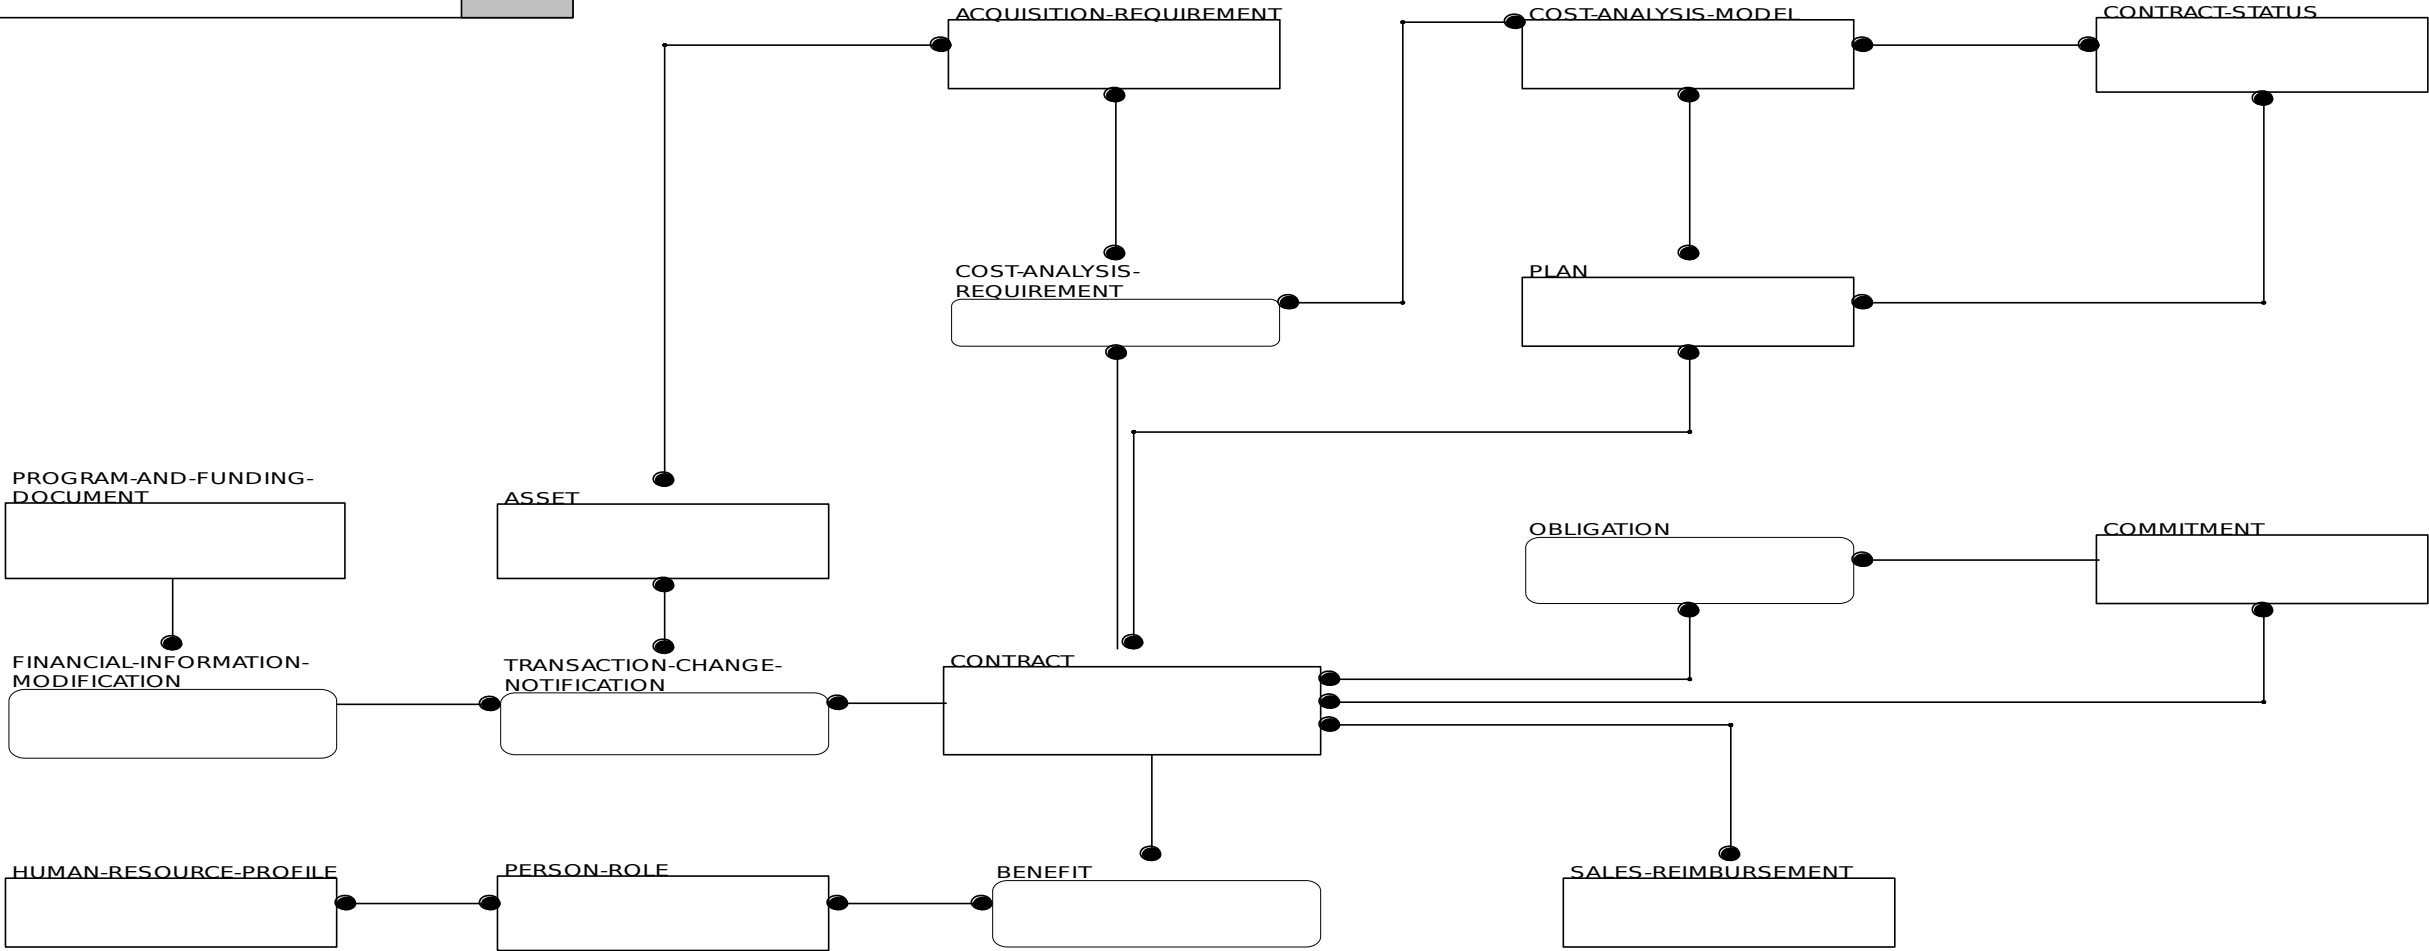

System Architect

Thu Mar 10, 2005 15:44

Comment

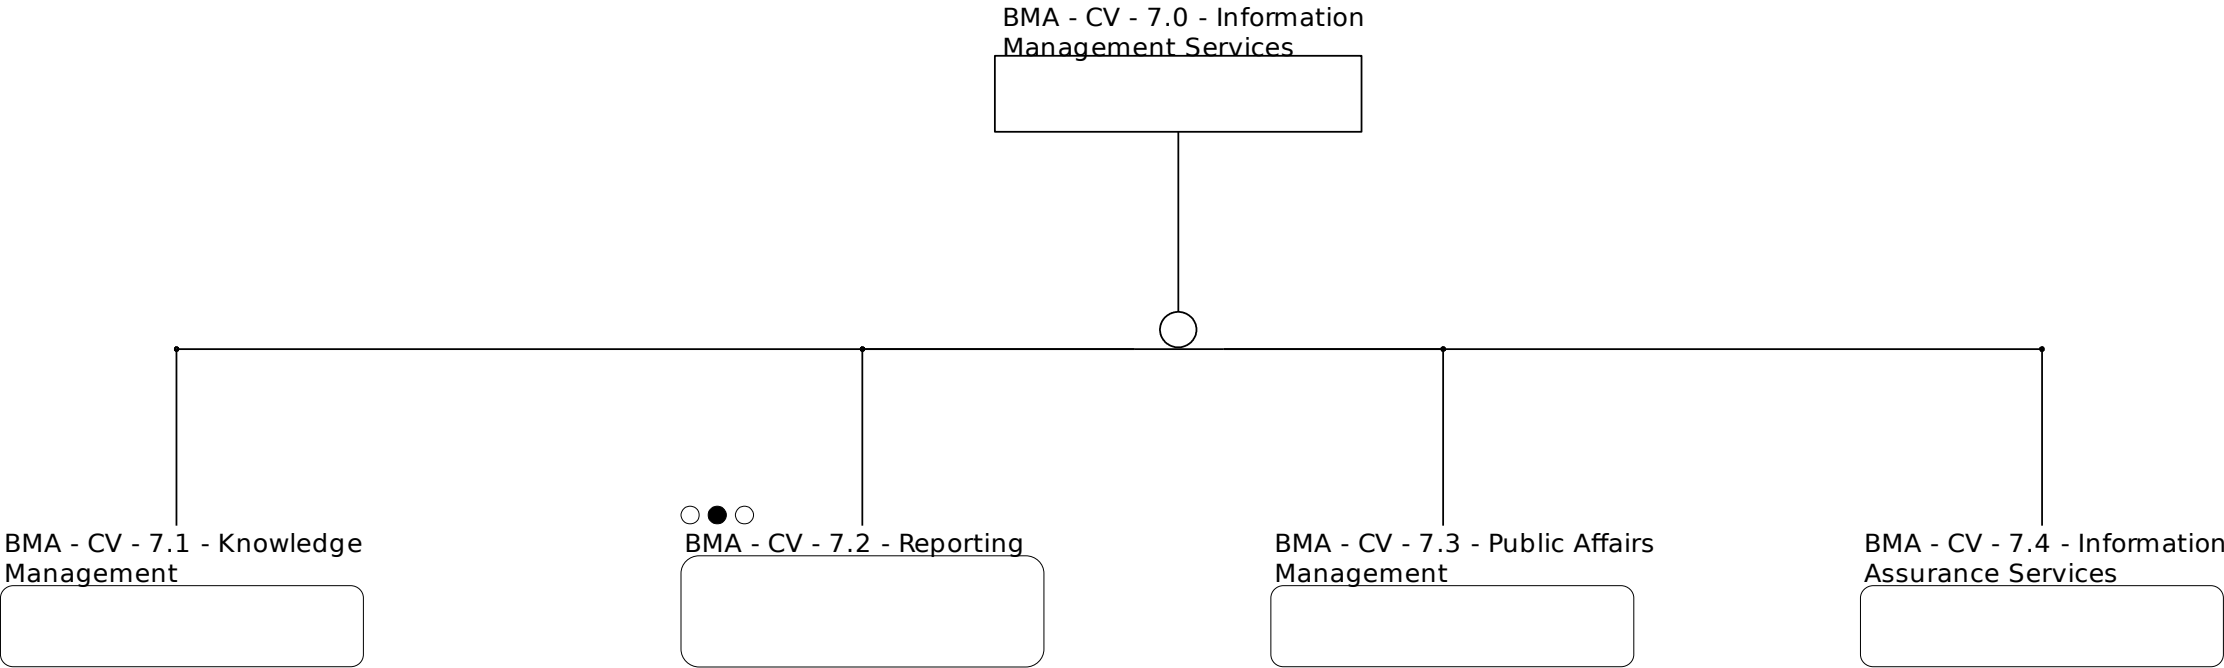

This view is associated with the management of benefits to support Department of Defense Quality of Life programs. This view also provides data for indirect compensation, wage supplements, indirect payments, and provision of Morale, Welfare, and Recreation Programs (including Chaplain programs, commissary, exchange, and other Non-Appropriated Fund (NAF) operations). This includes medical, dental, life and long-term insurance; pension/retirement; flexible spending; disability benefits; entitlements; benefits eligibility, including management of housing and educational benefits, enrollment and termination; tracking of health care administrators; savings management (Thrift/Bonds); and benefits reporting.

6.3 Benefits

BMA - CV - 7.0 - Information Management Services (OV-07 Logical Data Model Subject Area) System Architect Wed Mar 30, 2005 12:25	
Comment	
The Information Management Services view identifies the coordination of information resources to support or provide a service for or to an organization and its components or users. Information Management Services involves the coordination of information collection, storage, and dissemination and destruction.	

7.0 Information Management Services

BMA - CV - 7.2 - Reporting (OV-07 Logical Data Model Subject Area)

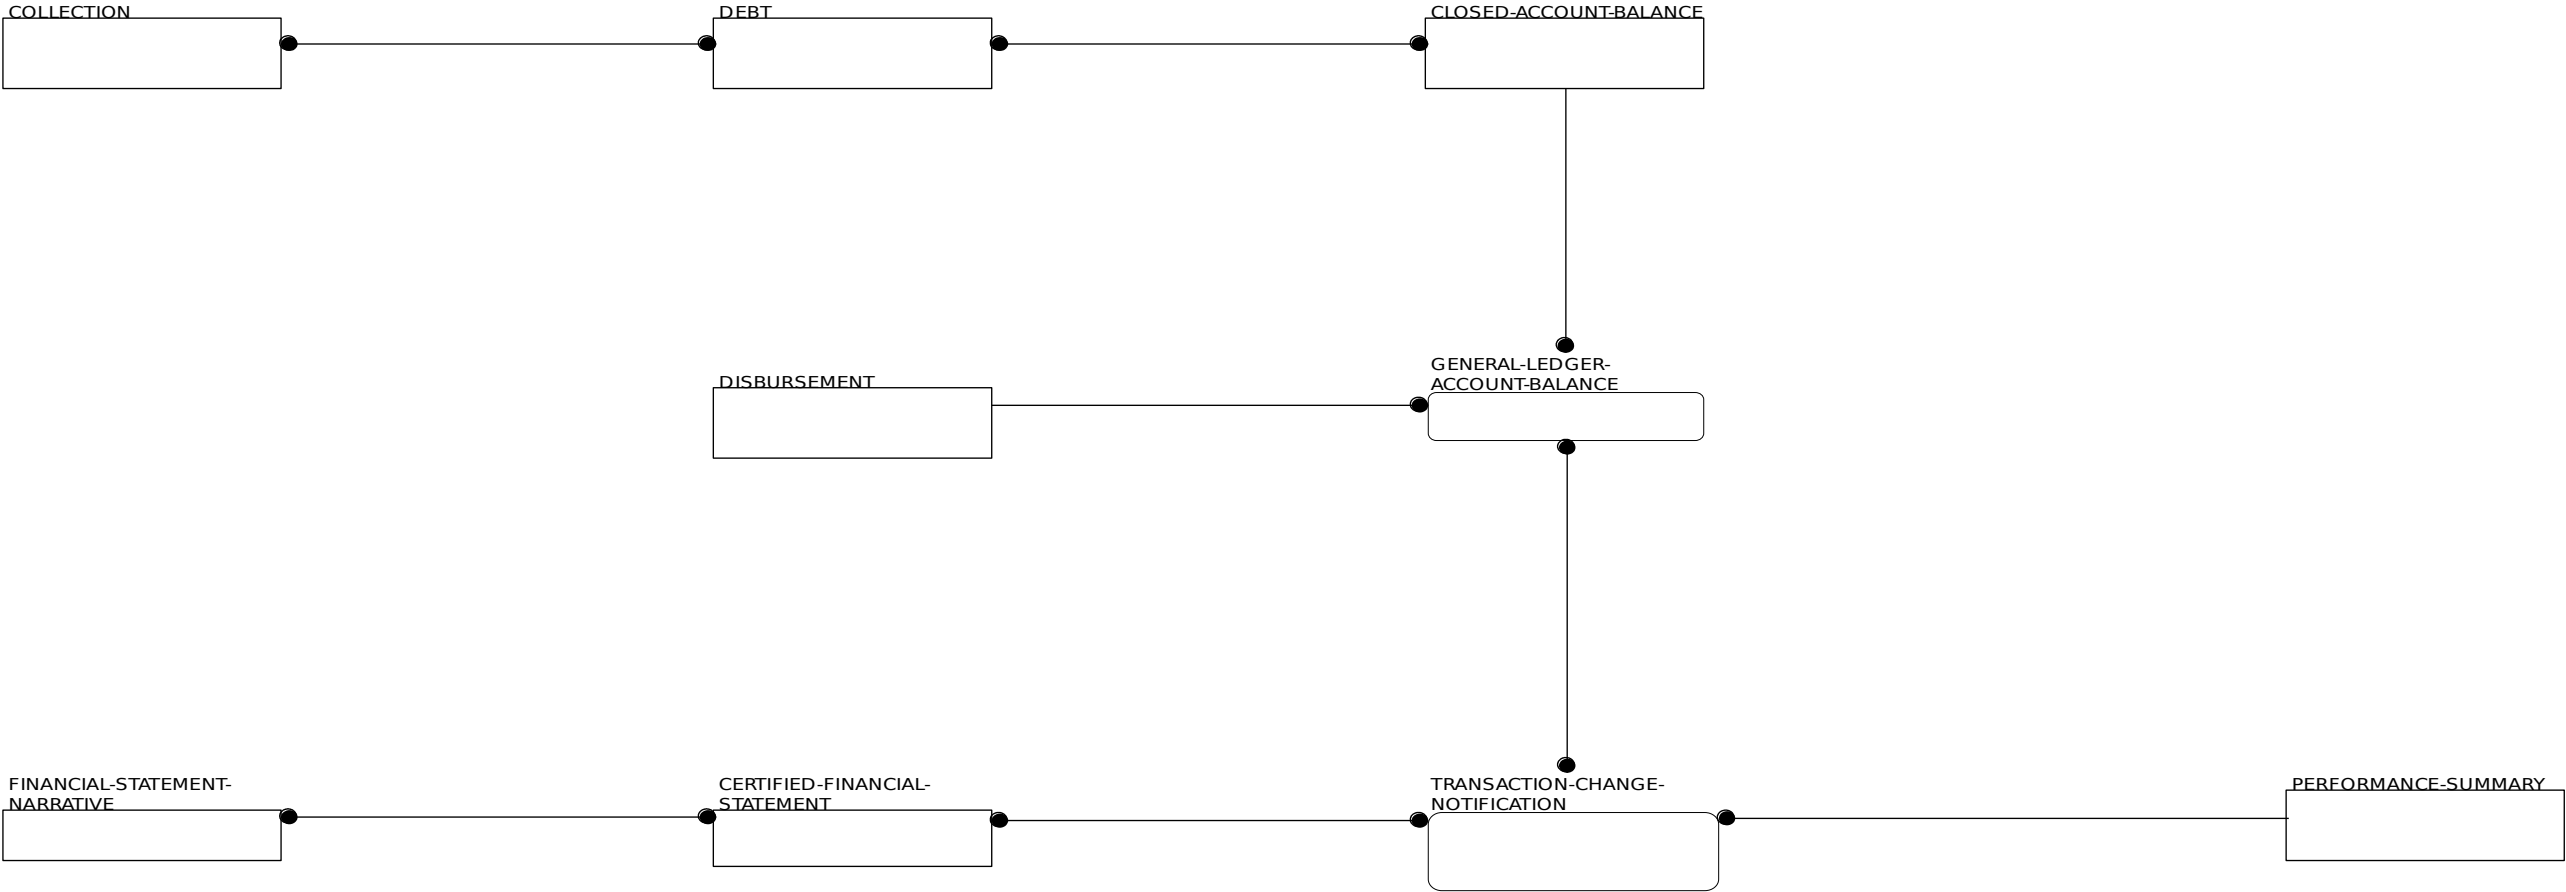

System Architect

Fri Mar 04, 2005 16:43

Comment

The Reporting view includes the process of receiving financial and management reporting requirements, preparing the information product, and distributing the finished product to the requestor. The activity distributes information in a specified format for analysis and decision-making. This activity routinely involves summarizing and clearly communicating information collected through various means and providing output results based on specified reporting requirements such as format, frequency and type.

7.2 Reporting

BMA - CV - 8.0 - Financial Management (OV-07 Logical Data Model Subject Area)

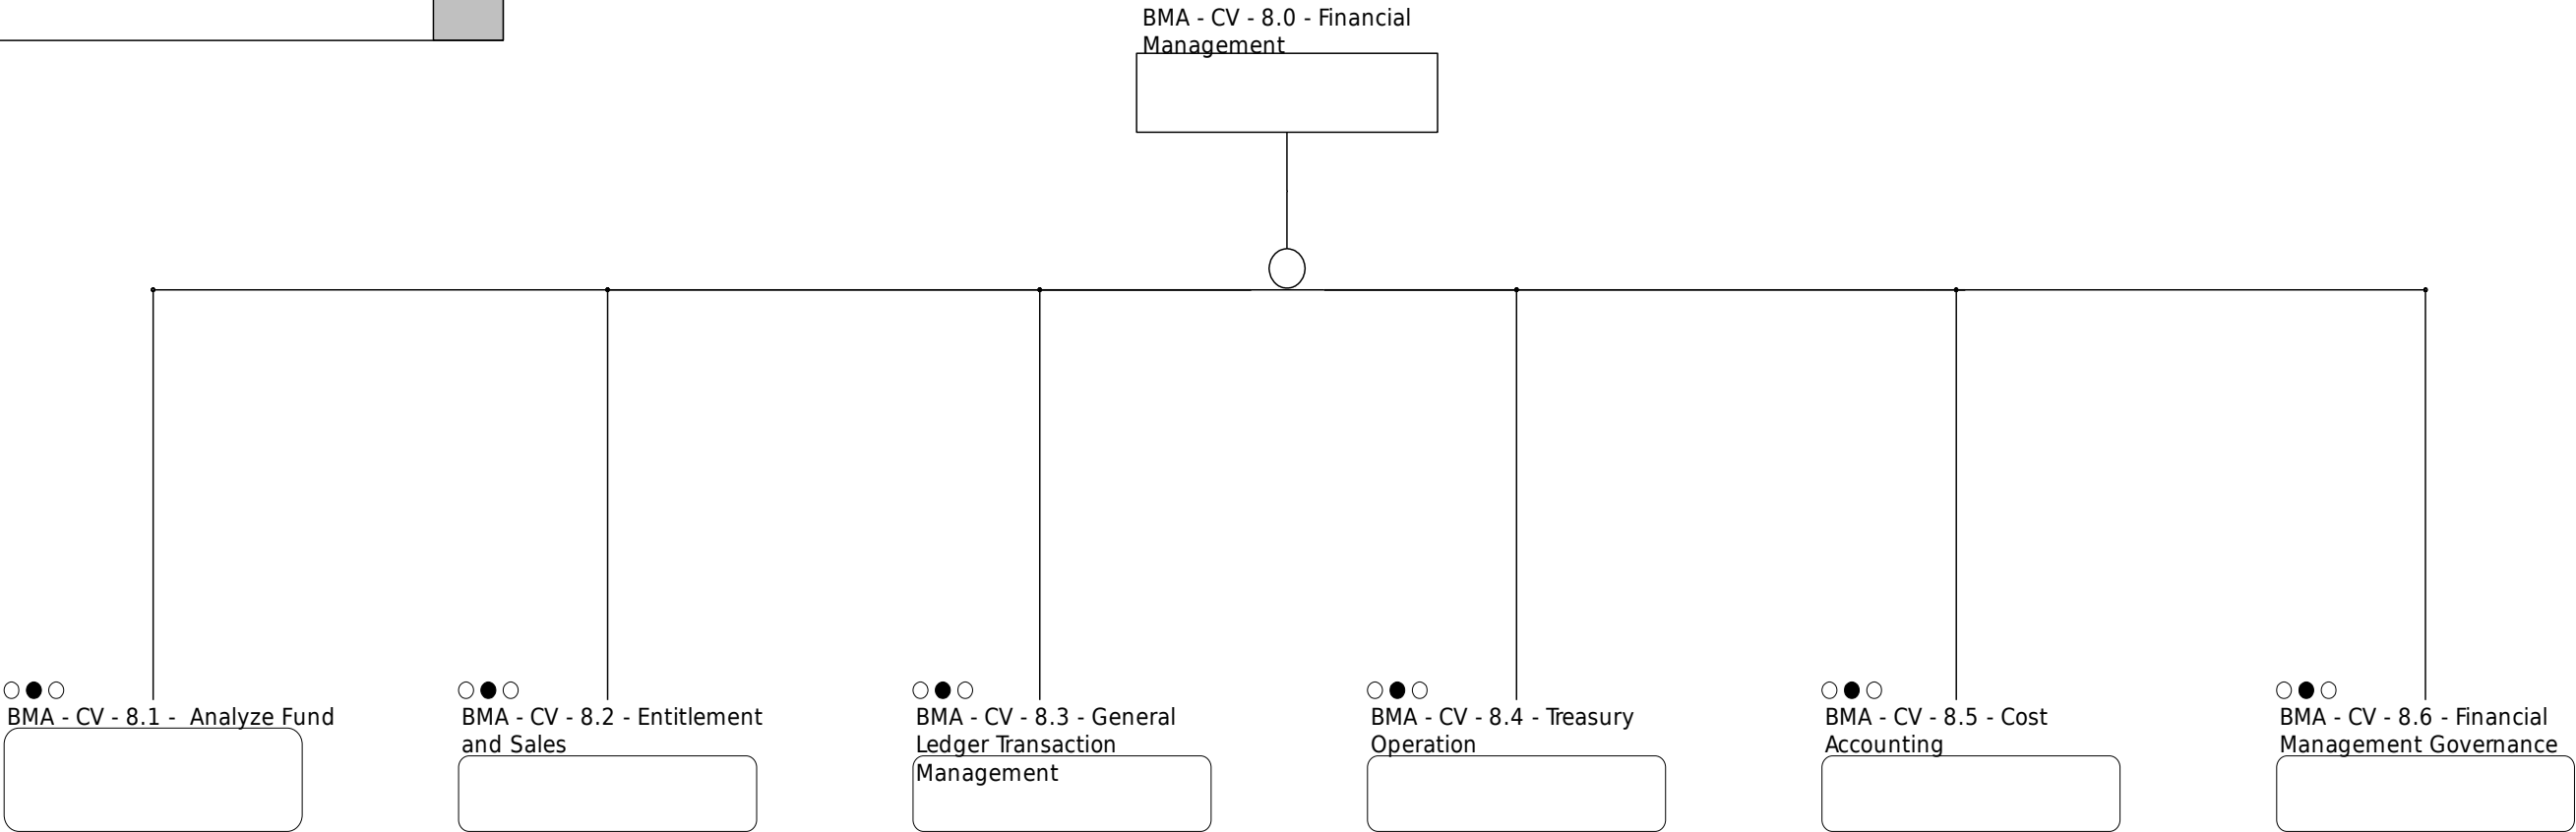

System Architect

Wed Mar 30, 2005 12:26

Comment

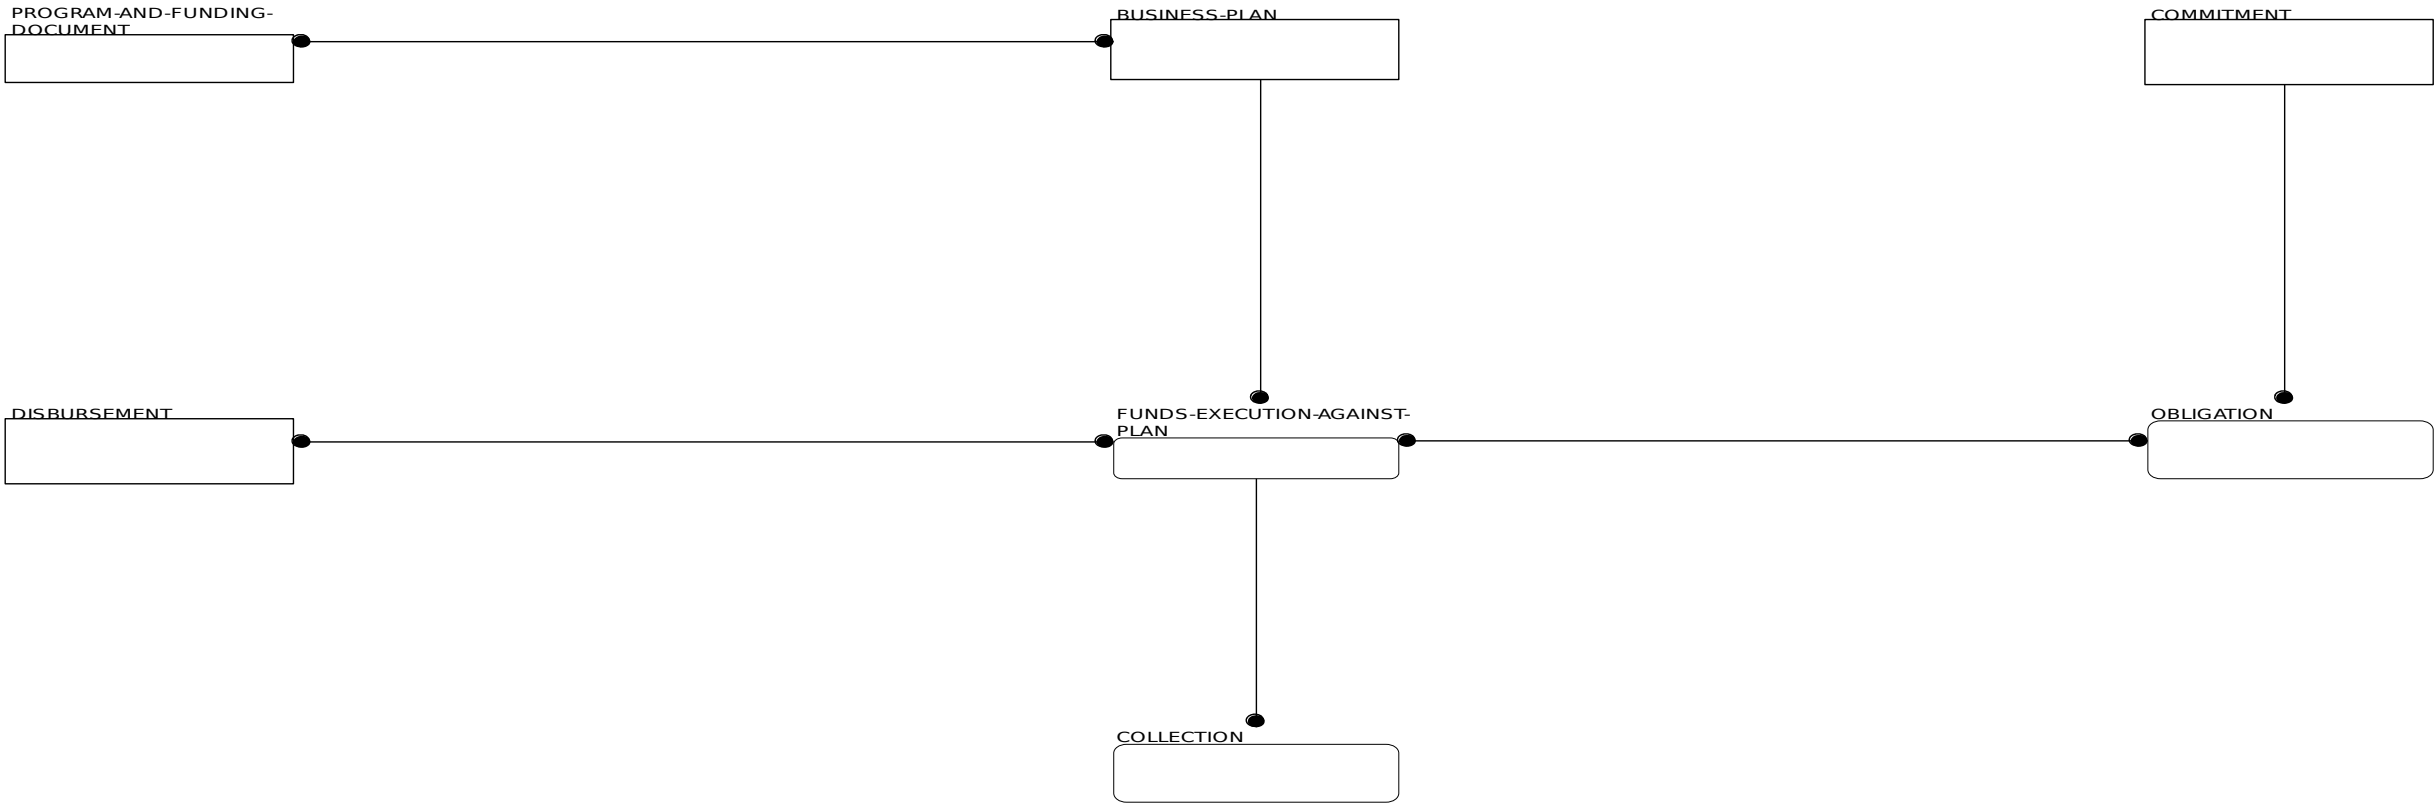

The use of financial information to measure, operate and predict the effectiveness and efficiency of an entity's activities in relation to its objectives. The ability to obtain and use such information is usually characterized by having in place policies, practices, standards, and a system of controls that reliably capture and report activity in a consistent manner.

8.0 Perform Financial Management

	BMA - CV - 8.1- Analyze Fund Management (OV-07 Logical Data Model Subject Area)	
	System Architect Fri Mar 04, 2005 14:49 Comment	
	The Analyze Fund Management view provides information to support the activity that manages funds that have been allotted by business plan and tracks subsequent execution of funds by monitoring commitments, obligations, and expenditures.	

8.1 Analyze Fund Management

BMA - CV - 8.2 - Entitlement and Sales

BMA - CV - 8.2 - Entitlement and Sales (OV-07 Logical Data Model Subject Area)

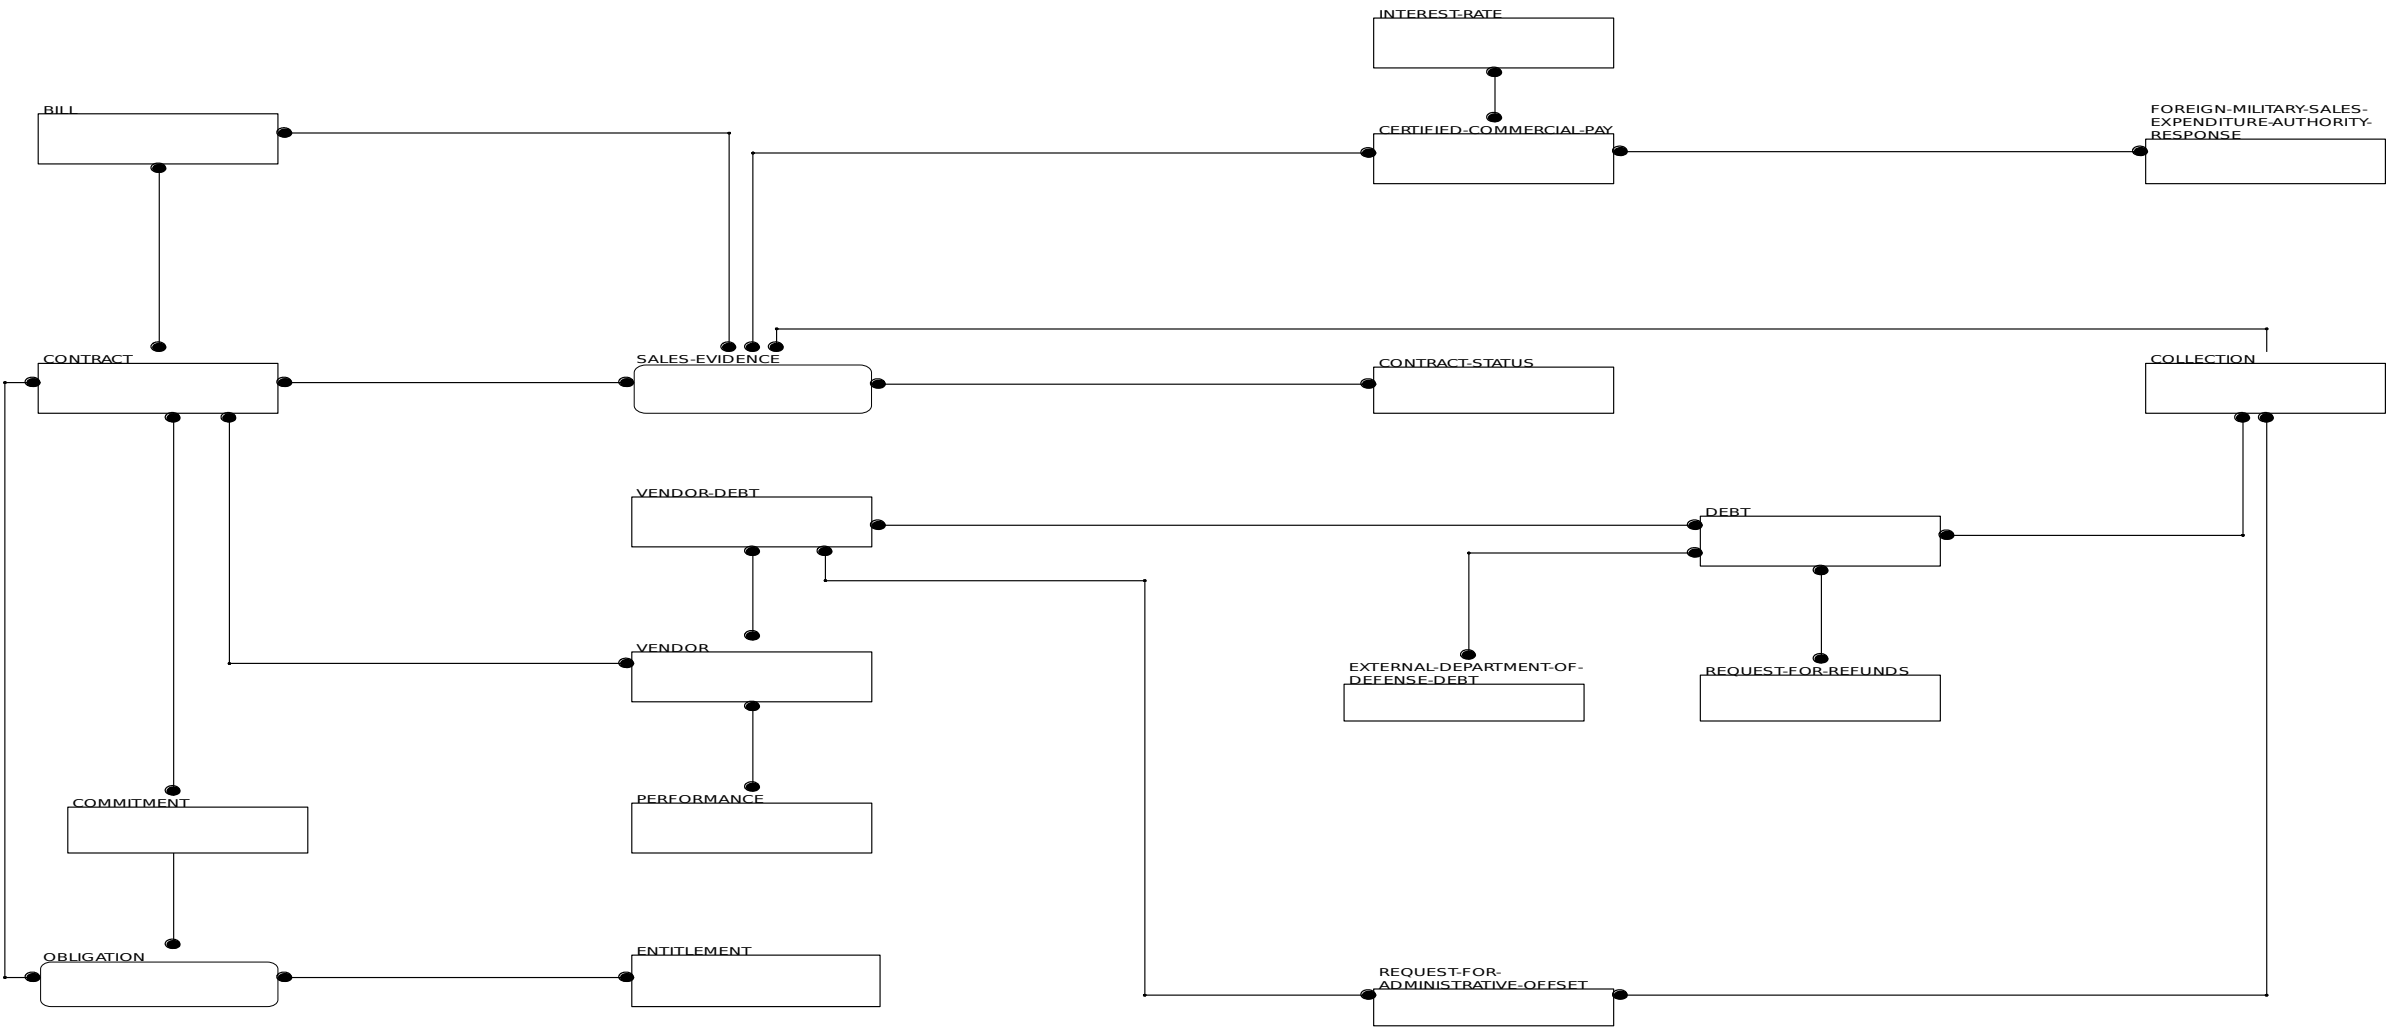

System Architect

Thu Mar 17, 2005 12:01

Comment

The Entitlements and Sales view provides data support for the activity that encompasses fund validation activities at both the commitment and obligation stages, as well as accounts payable activities associated with commercial pay operations. This activity further encompasses the management of all claims receivable accounts owed to the Department of Defense. This activity also includes the management of accounts receivable related to the sales of goods or services, to include the generation of a billing document.

8.2 Entitlements and Sales

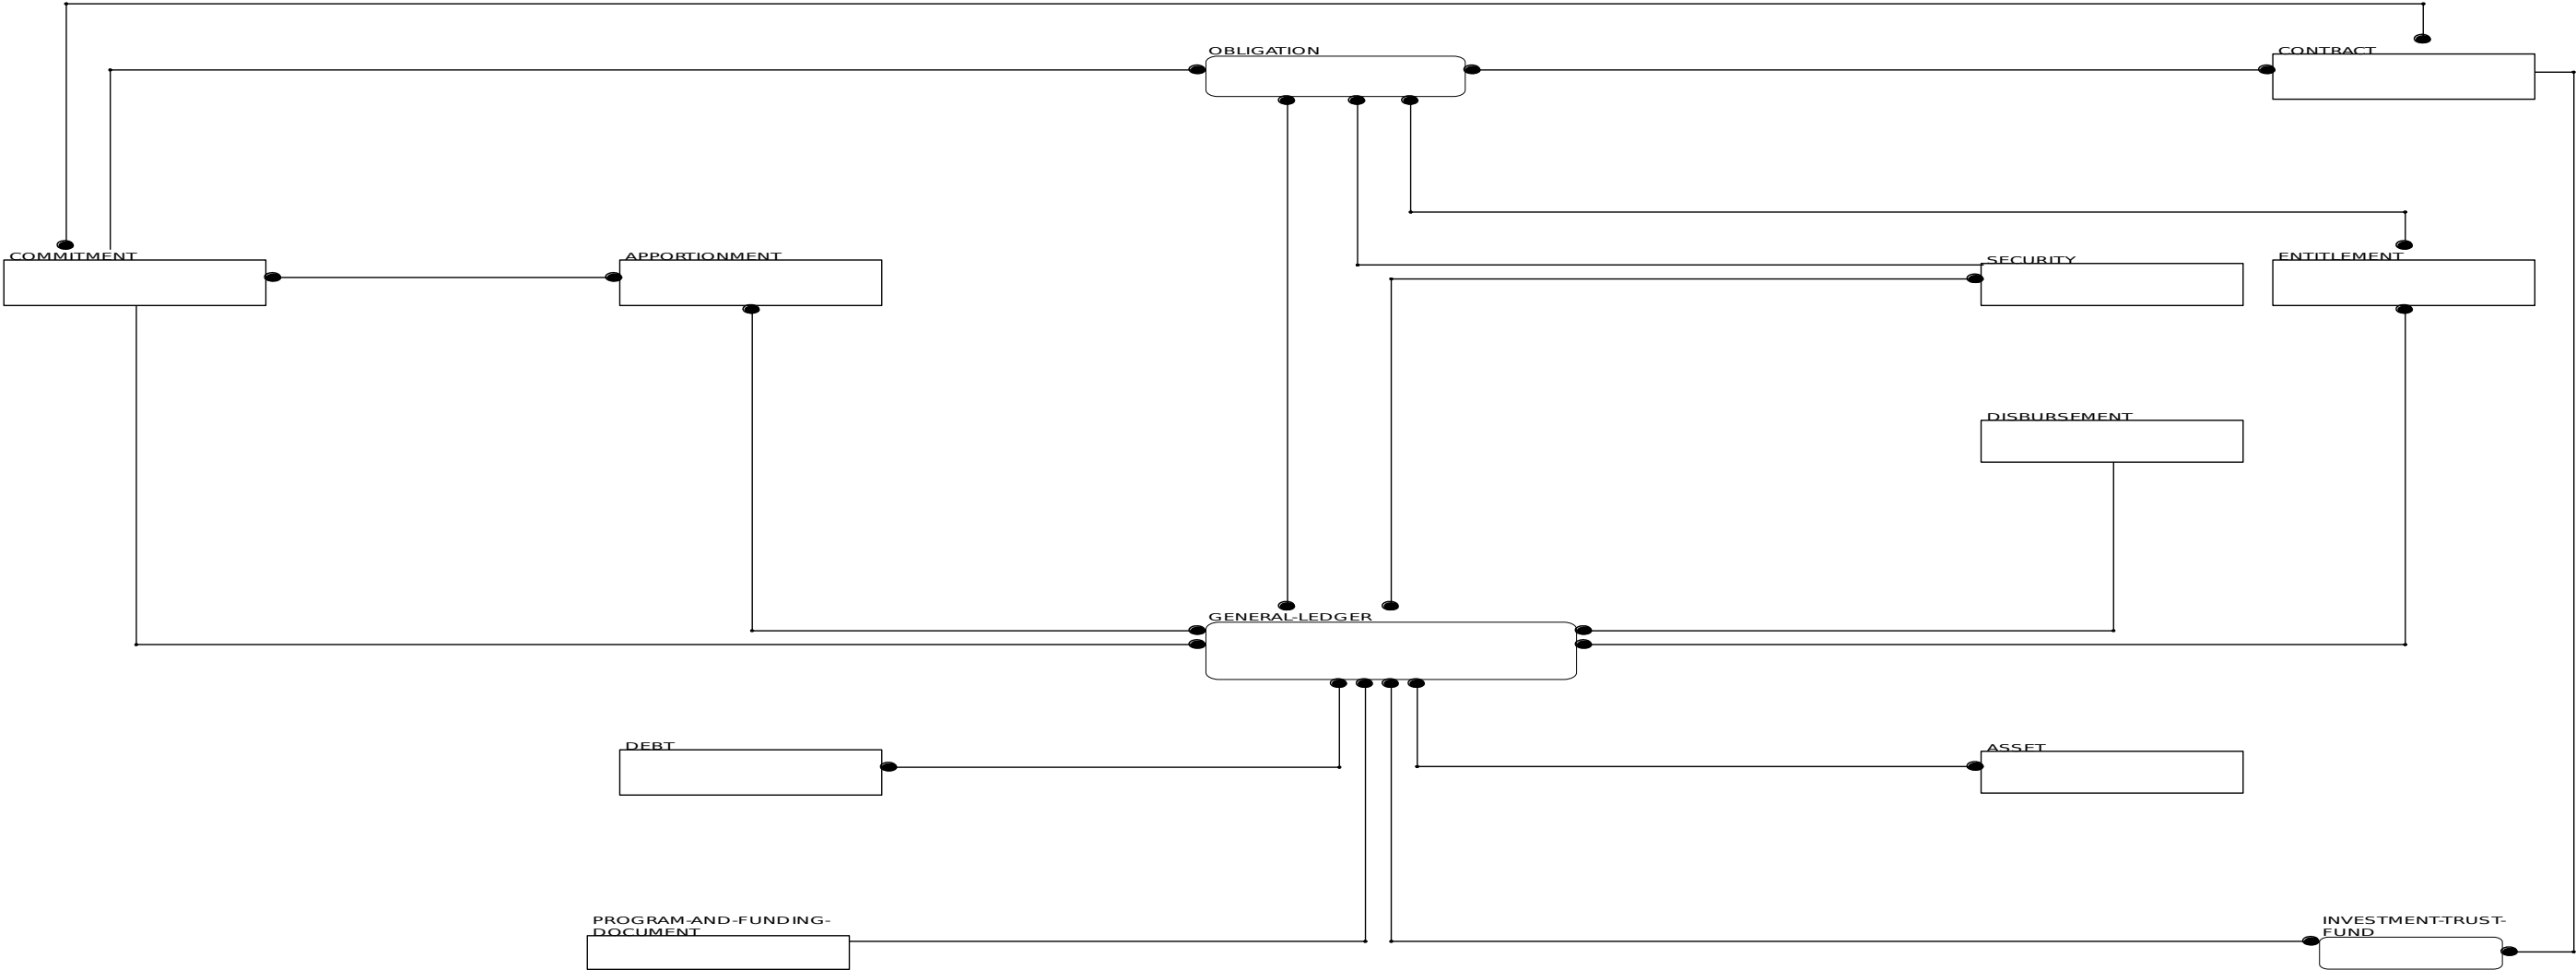

BMA - CV - 8.3 - US-General Ledger Transaction Management (OV-07 Logical Data Model Subject Area)
System Architect
Wed Mar 16, 2005 16:59

Comment

This subject area provides supporting data that encompasses accounting for assets, liabilities, fund balances, revenues and expenses associated with the maintenance of federal funds and expenditure of federal appropriations (salaries and expenses, operation and maintenance, procurement, working capital, trust funds, etc.). In accordance with applicable federal standards (FASAB, Treasury, OMB, GAO, etc.) the activity also includes posting all financial transactions to the general ledger, as well as the closing and review processes.

8.3 General Ledger Transaction Management

BMA - CV - 8.4 - Treasury Operations (OV-07 Logical Data Model Subject Area)

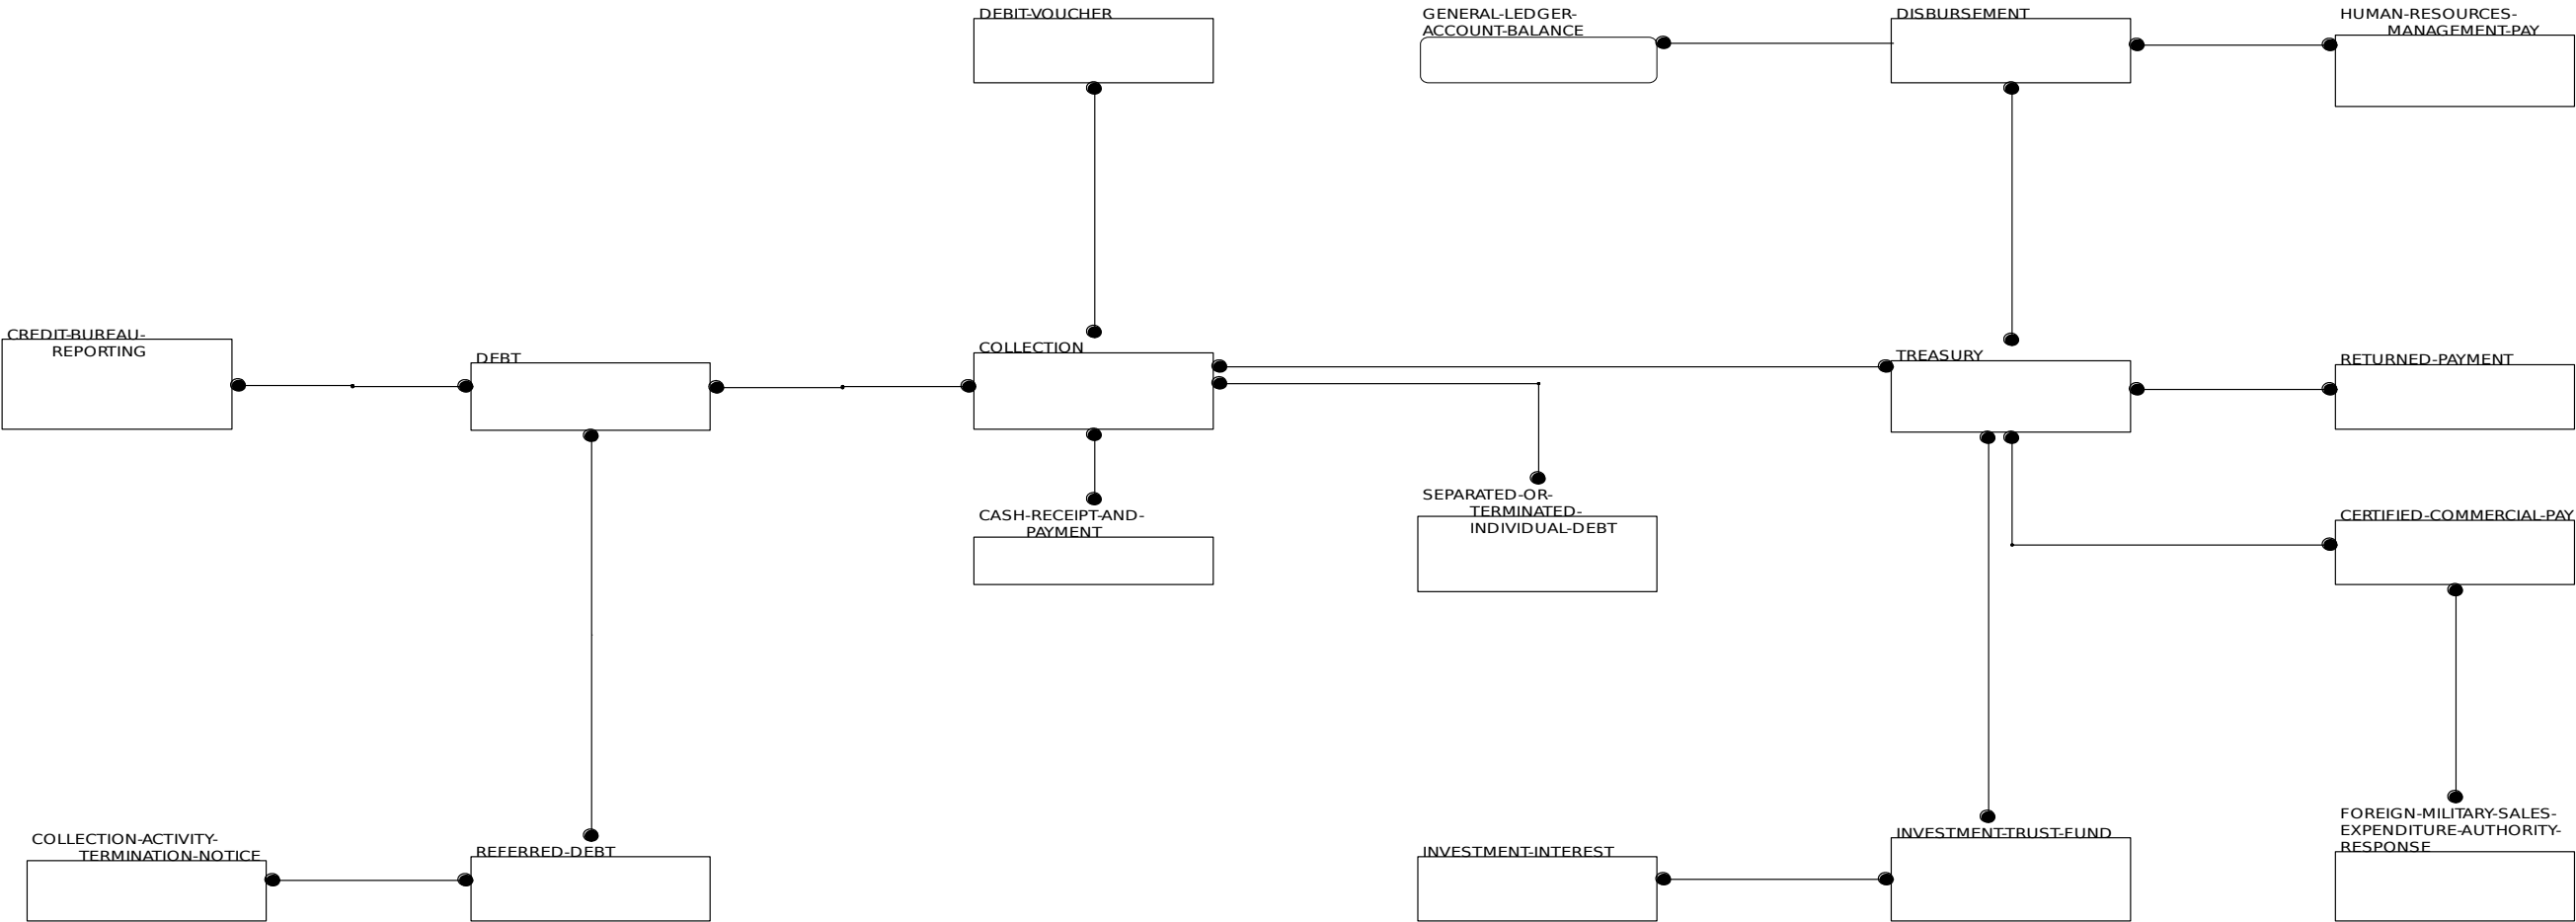

System Architect

Thu Mar 10, 2005 16:01

Comment

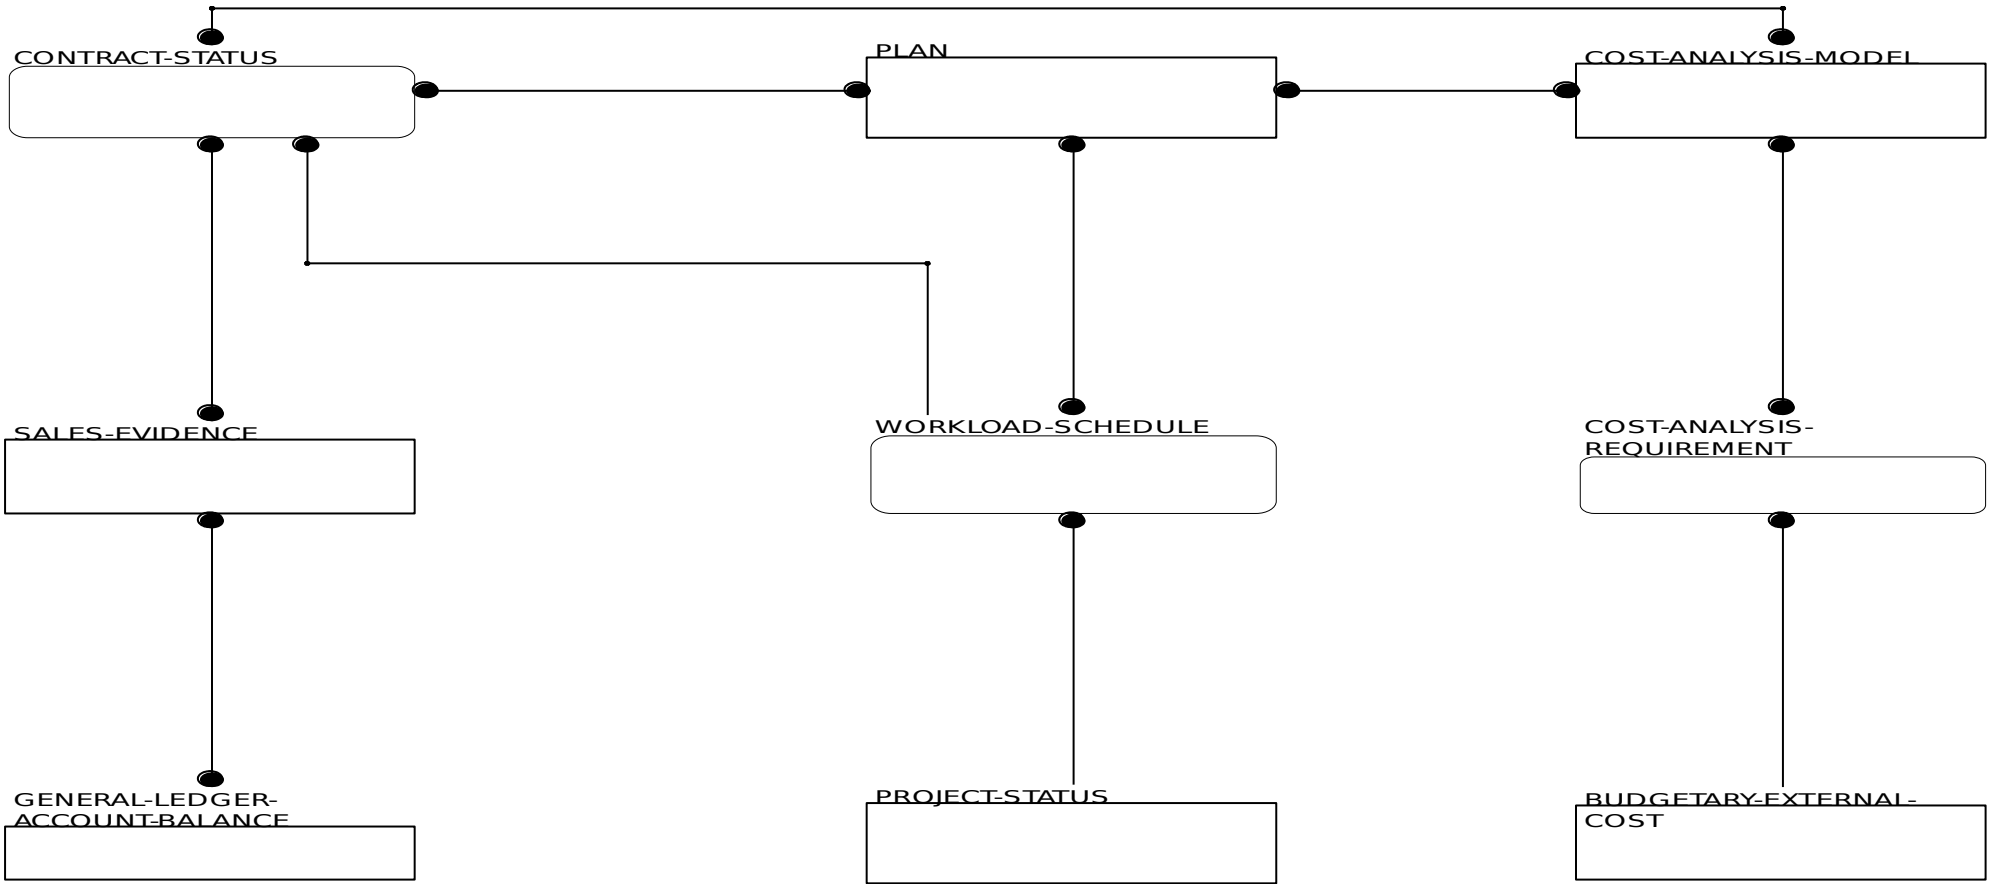

The Treasury Operations view supports the activity that processes disbursements, collections, returns and replacement financial instruments and delinquent receivables for the Department of Defense. This activity also involves the management of securities held for the production of investment revenues, net of premiums and discounts.

8.4 Treasury Operations

Wed Mar 30, 2005 12:29
Comment:
The purpose of this diagram is to show the entry/touch points with the Collections and Receivables (CAR) entities as they impact an ACCOUNTING-TRANSACTION through the sub-type entity. CAR initiates accounting transactions through the creation and collection of Account Receivables. They also deposit monies in financial institutions. These transactions create updates to the accounting system and also update the General Ledger.

TxV BEA TAXONOMY OVERVIEW (OV-07 Logical Data Model Subject Area)
System Architect
Wed Mar 30, 2005 13:01

Comment

This overview diagram displays the top-level categories of the Department of Defense's (DoD's) Core Taxonomy, v7.5a. As a group, the Taxonomy View diagrams show how the data supporting the DoD's Business Mission Area (BMA) fits with the DoD Core Taxonomy. Thus, the Taxonomy View can be used by future net-centric discovery services to identify the data contained within the BMA.

Directly below the top-level categories of DoD's Core Taxonomy are several layers of subcategories, each being increasingly detailed, increasingly focused, and increasingly narrow. Within the categories and subcategories are found fundamental entities representing major concepts of the Business Management Modernization Program's (BMMP's) Business Enterprise Architecture (BEA) OV-7 data model. More detailed versions of these fundamental entities and their relationships to other entities are contained within the BEA OV-7 Logical View diagrams.

BEA TAXONOMY OVERVIEW

Comment

This diagram represents the link between the Business Mission Area data within the Department of Defense and its association to the ENVIRONMENT portion of the DoD Core Taxonomy, v7.5a (which will be used for data discovery purposes across the DoD).

The fundamental entities within the BEA OV-7s are associated directly to the DoD Core Taxonomy, ensuring discovery of all data contained within the BEA.
